(<https://www.youtube.com/channel/UCqOG4zIDmbIUk12Fzwg5tLA>) on Fri Jun 18 2021.

This talk by FFF president Jacob G. Hornberger is part of the online conference The National-Security State and the Kennedy Administration <https://www.fff.org/national-security-state-kennedy-administration-webinar/>.

In 1960, John Kennedy came into the presidency as pretty much a standard proponent of the Cold War against the communist world. By the time the Cuban Missile Crisis was over, however, Kennedy had achieved a breakthrough that caused him to recognize the Cold War as a dangerous and destructive racket. By the time JFK declared an end to the Cold War in his famous Peace Speech at American University in June 1963, he was in a full-fledged war with the national-security establishment over the future direction of America. In this talk, Jacob will place the JFK assassination in the context of other U.S. national-security regime-change operations both before and after the Kennedy assassination and will highlight aspects of the JFK autopsy that lead inexorably to but one conclusion: a domestic national-security regime-change operation that was conducted on November 22, 1963.

[Music] welcome to the concluding presentation in our conference the national security state and the kennedy assassination i'm jacob hornberger president of the future of freedom foundation the sponsor of this conference and i'm the person who's going to be making this concluding presentation i should add however that we we were adding an additional session next wednesday same time 7 p.m eastern that will be entirely devoted to q a that will have some of the presenters who have participated in this conference and will have the entire block of time available for q a the title of my presentation is regime change the jfk assassination i should forewarn you that this presentation is going to be in the neighborhood of about two and a half hours so if you're a coffee drinker now would be a good time to put that pot of coffee on let's get started when john kennedy came into the presidency he came in as pretty much a standard cold warrior and what i mean by that is that he was inculcated with the same mindset that was inculcated virtually every other american which was that there was a an international communist conspiracy to take over the world especially the united states and that it was based in moscow russia it was believed that it was necessary therefore to wage a cold war against the soviet union and hot wars against communists in different parts of the world in order to prevent this conspiracy from succeeding now i say pretty much a standard cold warrior because kennedy was not on the same page as the national security establishment specifically the pentagon and the cia two of the principal components of the national security establishment

[00:02:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=120s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=120s)

national security establishment with respect to two important areas one involved independence movements in third world countries the cia and the pentagon were convinced that these independence movements were communist driven and that if they were permitted to succeed it would mean that the red wave would be getting closer to the united states kennedy's position was exactly the opposite and he had this position long before he became president when he was a u.s senator he said that actually the united states should be sympathizing and supporting these independence movements because they were really just ways to throw off the shackles of colonial rule by the old imperialist powers such as great britain belgium and france so that was one big difference and this point of contention actually came to reality after kennedy was elected to be the president but before he was sworn in and it involved the leader of the congo independence movement a

man named patrice lumumba the cia determined that this man lumumba was a grave threat to u.s national security because he he was leading this independence movement he had never done anything criminal against the united states but he was deemed to be a communist in this cold war environment you were you were either with us or you were against us and if you weren't with us that meant that you were automatically part of the communist bloc so the cia determined that patrice lumumba needed to be assassinated however they knew that kennedy's sentiments were sympathetic to these third world movements and probably lumumba and so they figured to avoid any conflict with kennedy right at the outset that they would assassinate lumumba before kennedy was actually sworn into office now we've all grown up under a system in which our government wields this power of assassination we've become used to it we're accustomed to it it's sort of ho-hum uh sometimes it's reported on the front page other times it's it's in the inner buried inside a newspaper sometimes not

[00:04:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=240s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=240s)

buried inside a newspaper sometimes not reported at all it's just become a normal part of american life but when you stop to think about it this truly is an extraordinary power this is the power of a government to snuff out a person's life simply on the determination that he is a communist or a terrorist or whatever and so what i want to do here at the very early start of this presentation is i want to digress and i want to examine with you how it is that our government the us government came to wield this power of assassination we've had three forms of governmental structure in u.s history the first one was the articles of confederation this came into existence after the break from england it lasted around 10 years and what was noteworthy about this form of governmental structure is that the powers of the federal government were extremely weak they didn't even have the power to tax people and that was the way the american people wanted it the last thing they wanted was a government with strong powers because they believed that the greatest threat to their freedom and their well-being lay not with some foreign threat but with their very own government and so to prevent this threat from materializing they had a government of very weak powers however there were problems with the articles uh trade wars things like this so when the art when the delegates met at the philadelphia convention the constitutional convention they it was with the purpose of amending the articles making them more efficient but instead they came out with an entirely different form of governmental structure what became known as a limited government republic the federal government here had many more powers than under the articles including the power to tax and so the american people were very leery and they said you know we've gone down this road with the british government we don't want to go down it again well the answer to this was that look this is not going to be a government of general powers with the power to do what it thinks is in the best interest of the of the people the best interests of the nation this is a government whose powers

[00:06:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=361s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=361s)

nation this is a government whose powers are going to be limited to those enumerated in the document that's calling it into existence the constitution so if a power is not enumerated then obviously they can't exercise it so that the american people bought that argument but only on the condition that the document be amended immediately after ratification and that's where the bill of rights comes in which really should be called a bill of prohibitions because it prohibits the government from destroying pre-existing rights like that congress does not have power to destroy freedom of speech because they figured that congress would be attracting people that would do precisely that punishing people for example for criticizing the government so the another factor here is that they were people were very concerned about was the power of assassination they did not want this government to have the power of assassination and that's how we get the fifth amendment no person shall be deprived of life without due process of law now this term due process goes all the way back to magna carta in the year 1215 and over the centuries in as as british resistance to the tyranny of their own government the king evolved due process evolved as well and it came to encompass two important principles one principle was notice formal notice of charges and the other was a trial so that before you could the government could kill the person they had to first let him know formally what he's being charged with like in an indictment and then after that it would be a jury and in our case the sixth amendment uh an impartial jury of one's peers in other words they didn't trust judges and tribunals to make this

determination regular people wouldn't make this determination and if and the jury's verdict is final that if a jury comes back and it says innocent or not guilty that person walks out of that courtroom free person and the government is prohibited from killing him at that

[00:08:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=480s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=480s)

prohibited from killing him at that point uh and and because no judge or tribunal can overturn that jury verdict of acquittal so the the this limited government republic system lasts for about 150 years there's a very small military force relatively small enough to protect people out west from native american attacks but there was a no vast military establishment there was no cia no nsa and the government operations were very very transparent in world after world war ii however everything changes and that's when the federal government becomes what we call a national security state totally different from a limited government republic now the government wields omnipotent powers the powers to do what it thinks are best for the country and in the interest of what they called national security and part of these powers was the power of assassination especially with the cia who began specializing in in assassination almost from the beginning now notice something important here that they didn't get this change through with a constitutional amendment they got it through with legislation but nonetheless it was deemed to nullify the fifth amendment now the fifth amendment which protects everybody americans and non-americans alike notice it says no person shall be deprived of life now the cia and the rest of the national uh uh national security establishment have the powers to snuff people's lives out without due process of law now as early as 1953 the assassination i mean the cia already had an assassination manual for its assassins you can read it online and uh it wasn't discovered till the late 1990s but here it it's explaining to its assassins different methods of assassination but equally important is that it was training them in the in the art of cover-up that is the art of doing things to

[00:10:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=601s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=601s)

that is the art of doing things to ensure that people never figure out that this is a cia operation so they wanted to assassinate people but they wanted to also ensure that it could never be traced to the cia keep in mind also that the cia starts attracting very brilliant people ivy league graduates harvard yale princeton unfortunately their mind these brilliant minds are being devoted to this dark art of assassination this dark art of cover-up rather than law medicine and the like so let's go back to lumumba now they've determined that he's a communist because he's the leader of this independence movement they decide that he needs to be assassinated and they decide that it's got to be done before kennedy comes into office to avoid a fight with kennedy over this assassination and they pull it off they kill him three days before kennedy is sworn into office uh the cia of course is the the agency that's supposed to provide the president with intelligence well kind of reflecting how they felt about kennedy you see that there was no doubt that the cia and the pentagon fully expected richard nixon to win the presidency in 60. and they he was right wing like the pentagon the cia where they were accustomed to working with him he was the vice president under the dwight eisenhower eight years and so kennedy wins and they look at kennedy as sort of a neil fight clearly he doesn't know what he's doing on national security and communism with respect to the third world so they treat him with somewhat disdain they keep it secret that lumumba's been assassinated so kennedy learns about this two or three weeks after he's sworn in he gets a telephone call advising him and you can see from this book cover jfk ordeal in africa the photographer was there and it caught kennedy's reaction at the moment he learns about lumumba's death so the cia was right i mean if they had waited for kennedy to be sworn in there was going to be a problem here and that's why they they completed the assassination before kennedy took office the other major point of difference other than the third world difference was respect to the civil

[00:12:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=721s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=721s)

difference was respect to the civil rights movement and martin luther king the cia the pentagon and the fbi which had become really a de facto member of the national security branch of the government they were absolutely convinced that the civil rights movement was a communist front and that martin luther king was a communist king kennedy took an exactly opposite approach again he took the position that we should be

supporting african americans they're just fighting for equal rights under the law they're trying to stop jim crow uh segregation they're trying to get voting rights the uh the position of the pentagon the cia was look you've got this worldwide international conspiracy what the communists are doing is they're using the civil rights movement as a front to stir up protests and riots and dissension and conflict and tension in order to pave the way for this communist takeover of the united states now at this um as soon as kennedy comes into office the cia presents him with a plan to invade cuba it's not going to be an invasion by u.s forces it's going to be an invasion by cuban exiles cubans who had left cuba but wanted to return without a communist regime there and they were the cia was training these these uh cuban exiles there's around 1300 or so more or less they were training them in guatemala so they present this plan to kennedy and kennedy says well can this plan succeed will it succeed without u.s sport because i don't want to get the united states directly involved in this in terms of invading and so forth the cia says mr president our intelligence is that the cuban people are ready to rise up against the castro regime they're sick and tired of it as soon as these guys hit the beaches those people are going to rise up and everybody's going to go to havana and cleanse the cuba of this communist regime and kennedy said fine so no air support from the u.s no invading troops the cia said they absolutely won't be

00:14:01 (<https://www.youtube.com/watch?v=BdQD9vNPYSk&t=841s>)

the cia said they absolutely won't be necessary kenny then turns to the military and says what do you think of this plan and the military through the joint chiefs of staff says mr president's got a fair chance of success well there was one big problem here the cia was lying flat out lying defrauding the president of the united states that they figured that this neophyte they were going to manipulate him and maneuver him into providing the air support for this invasion this was their plan that as soon as these guys hit the beaches and started to get massacred and captured by castro's much more powerful army then they would go to kennedy and say well you know we really need that air support and then kennedy wouldn't have a choice i mean he's a president how is he going to let these guys go down to defeat no president would do that right so the fateful day occurs and the the invasion is taking place at the bay of pigs in cuba and sure enough that they're getting shot up on the beach there the these guys that are very heroic um but very outnumbered so the cia according to their plan comes and says mr president well turns out things have gone really wrong we need that air support after all and fully expecting that they had boxed kennedy in because i mean how how can he let this happen and kennedy says well well no we agreed there would be no u.s air support it's not going to happen yes mr president but they're they're getting shot up sir we don't have a choice here no no not going to happen and so the president of the united states lets these guys go down to defeat 100 of them were were killed or so around a thousand of them were taken captive put in communist prisons 100 and have disappeared somewhere i mean you can imagine the reaction of the cia i mean livid absolutely live it okay they had played the president they had manipulated him but they never dreamed that a president would show weakness in the face of this communist this communist regime all he had to do was order the air support and then the

00:16:00 (<https://www.youtube.com/watch?v=BdQD9vNPYSk&t=960s>)

order the air support and then the invading troops could come in wipe this whole communist regime out of cuba in other words in their eyes he showed weakness maybe even cowardice when the test came to face these communists down his first test to face communists as a president kennedy for his part was just as livid furious he he is reputed to have vowed to splinter the cia into a thousand pieces and scatter it to the winds in other words destroy the cia he knew that what they had done he told an aide i cannot believe i'm this stupid to have fallen for this and so he fires alan dulles not alan dulles was the director of the cia at the time this guy was like a god within the cia i mean revered admired he goes back to the oss in world war ii kennedy summarily just junks the guy along with his chief deputy charles cabell and he then he he starts to reduce the powers of the cia transfers him to the military he starts to reduce the budget of the cia he puts his brother bobby who they hated in charge of monitoring the cia so from the very beginning the war is on between kennedy and the cia and it never got any better now at this point i want to digress again because it's helpful to understand the in order to understand the kennedy assassination it's it's helpful to put it in the context of other cold war regime change operations that the cia was undertaking during this period of time because

after all the question arises why invade cuba i mean what's going on here what's the purpose of the invasion cuba never attacked the united states or anything so what's the point of this war being initiated against cuba so what we're going to do is we're going to examine regime change operations in iran 1953 guatemala 1954. cuba 1959 to date they're still trying to get regime change there they still have their brutal embargo against the cuban people united states

[00:18:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=1080s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=1080s)

against the cuban people united states november 63 and then chile 10 years later in 1973. so in 1953 the prime minister of iran was a man named mohammed mosaddick most of that was highly admired in iran highly respected renowned all over the world actually he was time magazine's man of the year and iran had nationalized british oil interests and mohammed mosedeck was totally in favor of this they kicked out all the british officials so that they couldn't do anything about this nationalization and immediately that raises alarm bells in washington and within the national security establishment because here is a here is a man that was engaging in socialism the classic definition of socialism we all know government ownership of the means of production he put the oil industry under government ownership in iran and he had done it against america's ally in the cold war against the soviet union so it was determined that it was a virtual certainty that mosaddeq was going to end up in the communist side of this this war that was taking place this cold war so they targeted him u.s officials with a regime change operation they didn't target him with assassination interestingly enough but they targeted him with a coup that was orchestrated and planned by the cia very brilliant coup and they were able to house this guy which which was incredible because they asked a prime minister of a country a democratically elected one without an invasion just through subterfuge through this coup riots in the streets where innocent people were killed but they were considered expendable because this was to protect u.s national security so most of that gets under up under house arrest for the rest of his life and he and he's replaced by the shah of iran a very pro-us dictator and unelected but very very dictatorial with respect to the iranian people he immediately formed a group called the sabbah a domestic police force

[00:20:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=1200s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=1200s)

sabbah a domestic police force with the guidance of the cia that was a combination fbi cia pentagon and and nsa very brutal to maintain this tyrannical control over the iranian people if anybody spoke out against the shah they would feel the wrath of the sabbath well after about 25 years the iranian people have had enough of this and so they violently revolt against the shah that's when they took american diplomats hostage and uh unfortunately they were unable to restore the democratic system that that the cia had destroyed in 1953. in 1954 the very next year a man named akobo arbenz is president of guatemala democratically elected legitimate elections and the thing about armin's is that there was no question about his socialism he was a self-about socialist just just like bernie sanders today that he believed in socialism he favored it he believed that government should be helping the poor needy and disadvantaged he believed in government taxing and giving to from the rich and giving to the poor he he was putting communists into his administration he said what's wrong why shouldn't the communists have the right to participate in the political process but what sealed his fate was he just said i want no part of this cold war and i'm going to establish friendly and peaceful relations between guatemala and the soviet union and the warsaw pact countries that's what sealed his fate he now was deemed a grave threat to u.s national security now this is five years before castro but guatemala is pretty close it's south of mexico so it's clear that the red wave is getting close to the united states so they target arbyns with a regime change operation they had an assassination list here they still won't reveal that list they say that if they reveal this 1954 list that it would be a grave threat to u.s national security today but there can be no doubt that arbyns was at the top of that list even though he had never done anything against the united states in terms of criminal action of any kind well the cia pulled this off brilliantly

[00:22:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=1321s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=1321s)

well the cia pulled this off brilliantly i mean it was really a brilliant uh coup it was a it was based on fraud and deception and they pulled it off again without an invasion they get a president out of there with no invasion just through subterfuge and arbyn's to his good fortune escaped the country before they were able to assassinate him he was replaced by a brutal right-wing military dictator and a succession of dictatorships the country was thrown into a three-decade-long civil war that killed over a million people in 1959 fidel castro becomes president of cuba 90 miles off american shores at first castro didn't really openly declare he was a socialist but he did make it clear that he was declaring independence from u.s rule in cuba that didn't sit well with u.s officials especially in the pentagon and the cia the u.s had controlled cuba since the spanish-american war in 1898 spain i mean cuba was fighting for its independence from the spanish empire the us came to the assistance of cuba and defeated spain and then essentially double-crossed the cubans along with the filipinos and puerto ricos and puerto ricans and others and said we now control you we're stepping in the shoes of the spanish empire this was this was the turn toward empire that the us took at the last part of the 19th century and so they had a series of puppet regimes they had us troops occupying cuba that was how the u.s ended up with guantanamo bay one of their puppet regimes just signed a lease on very generous terms nominal rent into perpetuity and uh and that's how they get guantanamo now and we we often think that that fidel castro was the one that started the cuban revolution but he actually he wasn't that was a woman named celia sanchez you see uh the the brutal dictator that was ruling cuba in 1958 was an unelected pro-u.s dictator named fulanisho batista that u.s officials loved pentagon love the cia loved a very brutal guy but he was pro-u.s

[00:24:02 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=1442s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=1442s)

a very brutal guy but he was pro-u.s he had gotten into bed with the mafia he he gave the mafia permission to run the casinos in havana and then they were giving him a cut of the action under the table and one of his worst programs was that he would send his government goons out into the countryside in cuba or into small villages to kidnap young girls miners and then he would bring they would bring them in and deliver them over to the mafia who would then deliver them to the hotel rooms of the well-heeled gamblers is a perk for gambling high money there at those casinos well there was a woman named celia sanchez who i mentioned and she had a girlfriend who was raped in this manner a minor now these are minor of these girls and celia sanchez was so furious over the so outraged that she incited the revolution and cubans started rallying to her including fidel castro and but he ends up as the ruler of and uh that's how we got the bay of pigs i mean the idea behind the bay of pigs is that we've got to get rid of this guy because soon after this after he declares his independence there's there's a series of tit-for-tats between him and the u.s now i forget exactly the order but he nationalizes some american oil refineries there the u.s cancels all importation of cuba of sugar from cuba and and that really put a stranglehold on the cuban people they really depended on sugar exports to the us and then there's the embargo that the us puts on brutal embargo castro then starts nationalizing everything all american property there and finally he just openly declares he's a socialist he's a communist he's a marxist and he aligns himself with the the soviet union and the warsaw pac countries so now he is deemed a grave threat to u.s national security that there's there's no question that the u.s cannot tolerate this outpost communist outpost a red wave is now 90 miles away that's much

[00:26:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=1561s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=1561s)

wave is now 90 miles away that's much closer than guatemala that was the idea of this subterfuge behind with kennedy is it will get kennedy to give the air support then followed up with an invasion and will cleanse cuba of this communist threat like they had done in guatemala all right so we got the kennedy assassination in 63 we'll we'll talk about that in this presentation in 73 10 years later salvador allende is elected president of chile he's a very well-known man in chile he was a physician he had run for president before but he had gotten defeated in large part because the cia was funneling millions of dollars of ux taxpayer money secretly into the coffers of his opponent and these were legitimate elections the cia was interfering in these elections to defeat alien day but in 1970 they failed to defeat him he got a plurality of the votes and it got thrown into the chilean congress and they elected um allende now the thing about alien day is like arban some 20 years before he is a self-about socialist makes no bones about it believes in socialism believes that government

should help the poor believed in social social security medicare medicaid public education there was um so he made it very clear that this is what he believes in but what sealed his faith again was that he said i don't have anything to do with the uh with the cold war i i i want to make peaceful and friendly relations between chile and the soviet union the warsaw pact country and cuba which was still now being controlled by castro so he actually invites castro over to chile and and they go you know travel the country and motorcades and the masses are cheering them they loved them the wealthy didn't like him uh because he was a socialist he was taxing them to cover pay for the poor the military didn't like him because he was a socialist and the national security establishment

[00:28:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=1680s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=1680s)

the national security establishment there was right wing but the masses loved both him and castro because they were using government to help the poor needy and disadvantaged well needless to say he was deemed a grave threat to national security president nixon who is now president he's the guy that john kennedy had beat in 1960 he's now the president and he orders a cia let's go the route of a coup to remove this guy from office they didn't target him with assassination but the interesting part of this is they're going to use as part of this plot the the national security establishment in chile to remove their democratically elected president on the grounds that he is a threat to u.s national security and so nixon orders the cia create a lot of chaos economic chaos in chile which was just adding to the chaos that allende socialist policies were doing but uh nixon's exact words were make the economy scream and so the cia goes into chile and like pays truckers to go on strike national truckers they paid them under the table finds financing them so they'd have enough money during the strike so that they couldn't deliver food to the ch to the chilean people so that there'd be starvation and then people would be willing to have a coup maybe even demanding a coup so on uh but there was you know one big obstacle here as you can imagine that you know why should the national security establishment well first let me say that chile had the same type of governmental system that the united states had at this point they were a national security state vast military establishment intelligence establishment omnipotent powers and just like the united states did at this point they were both national security states so there's an obstacle here because obviously the military there the military intelligence establishment might say well why should we oust our democratically elected president just because

[00:30:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=1800s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=1800s)

elected president just because your national security establishment deems him a threat to your national security and in fact uh there was a man named um general renee schneider who is uh the commanding general of all chilean armed forces very principled man uh very had integrity very committed to his country committed to his country's constitution schneider says we're not going down the road to a coup uh that chile has a constitution just like you all do and our constitution provides as your constitution does only two ways to remove a president one is through uh impeachment and the other is through elections impeachment had already failed against allende so schneider says we're going to wait till the next election was like i think four years away and if the chilean people want to elect this socialist again that's up to them but we're going to wait for the election well the you can imagine what the response of the cia was to this now throughout this talk whenever i think there's something extra especially important that i want you to focus on i'm going to mark it with a double asterisk just so you know that i consider this very important so the cia's position asterix is that look you don't have the luxury of four years your country's going to go down to communists you're going to be another cuba by the time that election comes around you're going to be under a communist dictatorship and that in fact is the justification that the right wing here in the united states including uh conservative leaning libertarians in the libertarian movement take it's it's a position that right wingers in chile take today that if there had not been this coup chile would have been going the road to cuba communist takeover and therefore it was a good thing that he did um so despite the fact that the constitution doesn't provide for this that that they in other words that the

[00:32:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=1921s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=1921s)

that that they in other words that the national security establishment has a moral duty to ignore the constitution when the president poses a grave threat to national security and they are the determiners asterisk asterisks of what constitutes a threat to national security in the country they're the final call on this so on the fateful day september 11th not their 911 ironically enough in 1973 the national security branch of the government goes on the attack astrix asterix against the executive branch of the government full out war between these two branches of government the executive branch represented by a allende so the uh they try to first assassinate uh alien day with um with troops uh soldiers firing high-powered missiles uh well let me see they they're firing high-powered missiles uh bullets uh high-powered rifles at allende and they they don't succeed and now yen is fighting back and he's got people in the executive branch fighting against the national security branch and he's got a military helmet on they've got high-powered weapons they're shooting back so the the national security branch calls in the air force and specifically jet planes which which the nasa security branch owns jet planes they start trying to assassinate allende with missiles firing at him that doesn't succeed but at this point allende he sees the handwriting on the wall that there's no way that the executive branch is any match for the overwhelming power of the national security branch so he tells the people along fighting alongside of him the executive branch go ahead and surrender we cannot beat them and and you might as well save your life here and and so many of them did surrender and uh they were taken captive and brutally tortured and at the end of this allende is left dead

[00:34:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=2040s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=2040s)

dead uh he's um some people the official story is he committed suicide which would have been logical because he had to know that they were going to torture and kill him anyway and but others say no they shot him when he was fighting them and then they put the gun in his head hand and made it look like a suicide regardless it was the coup that left the democratically elected president of this country dead pinochet takes power and immediately starts rounding up socialists and communists 60 000 of them and and he authorizes his goons to torture them thousands upon thousands were brutally tortured especially to try to get information on other socialists that they had not yet captured or arrested the women were brutally raped and sexually abused and they did things that are unspeakable and unmatched unimaginable in in terms of these communist women they kill 3 000 of these socialists including two americans charles hormann and frank torugi with with the approval of the the military officials there from the united states who were there along with the cia and the reason they killed them is because they were uh they would been protesting against the vietnam war and that therefore made them socialists and and aligned with the communist bloc so that the us gave the okay you can kill them too now the the pentagon and the cia love this i mean this this was their hero pinochet because you see this was 73 there's there's a real war going on in vietnam at this point the communists are defeating u.s forces and they're killing u.s soldiers in vietnam within two years they will have run them entirely out of the country and here's a man over here that's equalizing the balance sheet here see this was a global war on communism so by rounding up 60 000 communists and raping them and brutalizing them he's kind of evening the score as to what's going on there in vietnam so they love the guy and they were flooding u.s taxpayer money into support him so that concludes a little synopsis of the regime change

[00:36:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=2160s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=2160s)

little synopsis of the regime change operations that were taking place let's go back now to the post bay of pigs period this was 61 to 62. now we find the military and the cia pressuring kennedy and descending troops to laos and vietnam southeast asia now obviously this is a lot further away than guatemala and chile and cuba right okay so why do they want him to send troops over there well remember this is a worldwide communist conspiracy that is supposedly based in moscow if and and the communists were trying to take control of the government in laos through violence uh yeah the vietcong trying to take control in south vietnam north vietnam was licking their chops they wanted to unify the country under communist rule under ho chi minh so the the national security establishment was telling kennedy look we've got to send troops over there to stop this that if we don't stop them over there the dominoes are going to start falling the red wave is going to get ever closer to the united states the argument was the same as the war on terrorism now that we've got to get over there and kill them before they come over here and kill us well kennedy was very

reticent about this you know he said uh laos is a landlocked country if i send combat troops over there that it's possible they could get surrounded like the french troops at yen bien fu and 54 and in vietnam he said i'm not going to do it over the over the vehement objections of the military and instead what he does is he negotiates with the soviet union of all countries the about enemy of the united states and and they they agree on a coalition government in uh in laos that includes the communists and you can imagine what the response to the military and the cia was that oh once you agree to put communists in there they're going to end up controlling the whole government in vietnam kennedy bent to the pressure um but remember he he's still a pretty standard cold warrior here i mean he believes you know this idea that that you got to stop this red wave

00:38:00 (<https://www.youtube.com/watch?v=BdQD9vNPYSk&t=2280s>)

that that you got to stop this red wave from taking over america but to reflect his ambivalence he he sends only advisory troops to vietnam to south vietnam his position was look it's their war the final analysis they got to fight it they got to win it we can give them help aid advisors weapons money but in the final analysis it's not going to be american troops to fight their war they're going to have to fight it and win it on their own so he sends 10 or 11 000 advisory troops and expressly says to the pentagon no combat troops at all in the meantime the the military is now pressuring kennedy to send troops into into cuba like ground troops invade the country their argument was america cannot stand this is a grave threat to national security you've got this communist outpost 90 miles away it's like a front that's they're acting on behalf of the soviet union we got to get rid of this thing america is just too much in danger here and they were calling for an invasion kennedy says no the u.s is not going to go down that route where we invade this country for a regime change but he did operate uh authorized operation mongoose he's still a standard coal warrior he was still trying to to get rid of the castro regime but with operation mangas which was an extensive campaign of sabotage within the country blowing up state-owned enterprises and terrorist attacks against civilians and other covert operations all carried out by the cia at the same time the cia enters into an assassination partnership with the mafia the world's premier criminal organization remember this was this was batista's partner in havana well they wanted their casinos back castro had nationalized all of them and so they had an incentive to enter into this partnership with the mafia now the cia's always claimed that this was with president kennedy's authority and bobby kennedy who is the attorney general's authority it's pure nonsense kennedy made it very very clear to

00:40:00 (<https://www.youtube.com/watch?v=BdQD9vNPYSk&t=2400s>)

very clear to friends that he opposed state-sponsored assassinations that he would never go down that road bobby kennedy was prosecuting the mafia viciously in federal court for criminal activities there is no possibility that he would enter authorized entering into a partnership with the people he was prosecuting as attorney general so this was a cia operation from the get-go and they made a repeated attempts to assassinate fidel castro asterix asterix repeated attempts unsuccessful attempts so kennedy is resisting invading cuba he doesn't want the u.s to go down this this road of initiating in a war of aggression against a country that hasn't attacked the united states so the the the joint chiefs of staff decide they're going to get him off the hook so they present him with a plan that's unanimously approved by the uh by the joint chiefs of staff unanimous they were very enthusiastic about this plan but this plan is riddled with fraud and deceit throughout it is really an extraordinary plan that they're asking kennedy to do it called for uh acts of terrorism against american and civilian targets there were going to be terrorism all across the country in different cities it was going to be like the ted offensive here with terrorist attacks in miami new york wherever uh also attacks in guantanamo bay there was going to be plane hijackings there were going to be attacking cuban refugees they were fleeing cuba on the high seas innocent people were going to be killed and then it was all going to be because cuba attacked the united states uh well of course the the fraud comes in in that these were actually going to be pentagon agents or cia agents posing as cuba's communist agents and then kennedy's job would have been to go on national television and say my fellow americans we have been attacked by the communists that cuba has attacked the united states with these terrorist attacks plane hijackings and this will not stand

[00:42:02 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=2522s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=2522s)

plane hijackings and this will not stand this is another day that will live in infamy we're shocked and uh i've ordered the secretary of defense to mobilize america's bombers and ground troops and we're going to go in there and defend ourselves by removing this communist regime that was the plan well to kennedy's everlasting credit he says no nexus and he had to understand also the black blackmail potential here because if he had gone along with this plan for the rest of his time in office two or six years uh the cia and the pentagon could have just strolled in his office anytime they wanted and said we need you to sign off on this program on our budget here uh oh and we're protecting your secret we want you to know that mr president we're protecting your secret about operation northwoods and how you lied to the american people that was j edgar hoover's method of course the fbi director that he would acquire secrets on people not for the purpose of destroying them but for the purpose of bending people to his will well kennedy was a smart guy undoubtedly he understood the black male potential here but the real reason is he says the united states is not going down this direction of fraud and deceit to get this regime changed well then the worst happens the soviets are caught installing missiles nuclear missiles in cuba in october 1962 is six months or so after kennedy rejects operation northwards and the cia discovers this and now the cia and the military are saying well now we don't need operation northwards now we got justification these are offensive nuclear weapons they said what the mainstream press claims well actually they were defensive weapons that that castro loved them because they provided a means to deter another u.s invasion i mean he knew the the cia in the pentagon wanted to invade cuba and he knew that his army was no match for the us army it could defeat some cuban exiles but there was no way he was going to beat the u.s army well nuclear missiles are a great equalizer

[00:44:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=2640s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=2640s)

nuclear missiles are a great equalizer not only to deter an attack but also to defend against an attack and he was prepared to use them from the from the get-go well so they're pressuring kennedy big time now you've got to invade you got no choice america cannot stand in and these short-range nuclear missiles could reach some of them were tactical nuclear weapons just to hit troops coming in but others could reach miami they could reach new york they could reach the eastern seaboard the big ones that had not yet arrived could reach all over the united states so they're saying we need to get in there and bomb those things right now when they're installing them going in there and bomb them pressure is on kennedy and what the cia didn't know is that the missiles were already armed and so obviously kennedy didn't know this and and the soviet commanders on the ground were prepared to use them now they needed technically to get permission from moscow but once the once the bombs come in you never know what's going to happen if and if one missile starts flying nuclear missile that's it it's all out nuclear war and kennedy understood this they came within a quarter of an inch of all-out nuclear war here we wouldn't be having this conference today if that had happened so kennedy says no resists the pressure of the military and the cia and says i'm going to go very cautious here so he imposes a quarantine or a blockade stopping soviet ships which was an act of war i mean it was a very dangerous move because khrushchev had every right under international law to keep moving but if he had kept moving there is virtually no doubt all that nuclear war would have broken out kennedy would not have permitted that blockade to be broken and sure enough when the when the ship with the big nuclear weapons gets close to the quarantine line khrushchev to his everlasting credit stops and decides not to to breach the the quarantine line well in the meantime khrushchev and kennedy start negotiating through a black black back channel that consists of his brother bobby kennedy and the soviet ambassador anatoly de bruyne who he personally knew the myths of

[00:46:02 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=2762s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=2762s)

who he personally knew the myths of these negotiations bobby kennedy goes tells de bruyne personally says look you need to go tell khrushchev that my brother is under severe pressure by the military and there is a very good chance they will overthrow him and seize power they have no confidence in my brother's ability to resolve this crisis so we're going to cut a deal you better tell chris jeff that we need to cut it now

because this american army could easily get out of control and and de bruyn said that he could see from the the the lines the the worry lines and stuff the gravity in bobby kennedy's face that he was telling the exact truth that this was not a negotiating tactic and so debrina goes tells khrushchev this and khrushchev freaks out because he understands this that the military takes control they're looking at all-out nuclear war and khrushchev knew that due to the overwhelming nuclear superiority of the u.s that the entire soviet union would be wiped out in nuclear war i mean the entire country would be radiated they would be able to get some blows into the united states killing around 40 50 million americans but there'd be a lot of americans still surviving um but of course you know the kind of society they need society surviving it would be something else also you know they they could have fired missiles at europe which they undoubtedly would have and uh all of europe would have been radiated as well so khrushchev says i need to strike a deal fast here if this military comes in it's all over and khrushchev was just as scared as kennedy they knew they were within a quarter of an inch of nuclear war and and khrushchev was just as scared as kennedy was so they strike a deal and um part of this deal is that kennedy says look i will give you my word my vow that we will not invade cuba okay cia pentagon no more invasion of cuba you got my word castro says done and it's part of my deal i promise that i'll remove my missiles and bring them home done now at

00:48:01 (<https://www.youtube.com/watch?v=BdQD9vNPYSk&t=2881s>)

missiles and bring them home done now at the last minute khrushchev adds another condition he says oh one more thing you need to remove your nuclear missiles out of turkey which is right on our border and they're aiming at us what yes that while the pentagon the cia is over here saying bomb cuba because of this great threat to national security with their missiles we've got our missiles over there pointing at them i mean imagine if the soviet union had bombed those missile sites what the pentagon the cia would have said about that well kennedy was a very wise man and he saw the hypocrisy here immediately and he said i'm not going to let this hold up the deal and he says done but he says to khrushchev give me six months so it's not doesn't look like it's part of this deal politically and christian says done and so six months later sure enough kennedy withdraws the missiles out of turkey very quietly as part of this deal needless to say both men were extremely relieved that this thing had been resolved kennedy knew how close they had come khrushchev knew how close they had come and uh kennedy calls the joint chiefs of staff together to thank them for their service during this crisis and they were livid absolutely furious at what had happened here one one of the joint chiefs of staff uh called it he said we've been had that was his words we've been had and kennedy's fiercest enemy uh in the national security establishment was general curtis lemay when kennedy installed that blockade lemay who is kennedy's inferior i mean he's a general but the commander-in-chief of the army is the is the president he's the president of the united states he's the commanding chief of the arms forces and this man's a subordinate he gives this nasty personal attack against his superior officer he says that blockade is as bad as the appeasement in munich

00:50:01 (<https://www.youtube.com/watch?v=BdQD9vNPYSk&t=3001s>)

appeasement in munich so he wanted him to bomb cuba and uh he uh what he's referring to is that john kennedy's father was the ambassador to the soviet to the to great britain in world war before world war ii and so when neville chamberlain entered into that pact with with uh hitler in munich joe kennedy was aligned with that was supportive of it so this is what he's saying to kennedy a nasty personal attack he's bringing up his father here then in the midst of the crisis he says mr president you're in a pretty bad fix here now no no kennedy should have fired him for insubordination right there and had him court-martialed because you see notice he's not saying america's in a pretty bad fix or we're in a pretty bad fixture mr president he's saying you were in a pretty bad fix what he's what he's saying here is that look you idiot you you didn't invade you didn't provide those that the air support at the bay of pigs if you had them we wouldn't have this problem castro wouldn't be there you didn't take our advice to invade cuba after that you didn't accept operation northwoods when we unanimously told you you should do that and now look at the fix you find yourself in kennedy was furious he he and dally was shocked the subordinate officer was talking to him this way he turns to him and said what did you say and lemay doubles down he says i said you're in a pretty bad fix and then after this whole thing was resolved lemay called it the greatest defeat in our history the greatest defeat

in our history and what in his mind it was because what he's referring to is that kennedy cut a deal that now put cuba under permanent communist control because invasion was the only way to remove this regime operation mongoose clearly wasn't going to do the trick and kennedy now had taken off the table now this threat to america grave threat to america was there permanent you can imagine how cuban americans felt about this in cuban exiles

[00:52:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=3120s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=3120s)

exiles all their hopes and dreams right then were dashed with kennedy's uh cutting this deal the biggest defeat in our history now at this point kennedy achieves a gigantic breakthrough and so did khrushchev ironically enough at the very same time it's one of these giant breakthroughs that that hits people at various times in their lives sometimes it was a breakthrough he like kennedy had two toddler children carolyn and john john they were there in washington during this crisis he knew that if the nuclear weapons had started going washington was going to be hit for sure uh his kids would have been killed his wife would have been killed lots of people's children and wives had been killed and he anguished over this how close they had come to do this to armageddon and all suddenly a jesus breakthrough and thinks to himself you know this cold war business is a bunch of bull that we don't need it it's a dangerous and destructive racket i'm going to bring it to an end i'm going to establish peaceful and friendly relations with the soviet union the warsaw pact countries and cuba see what's happening here this man is now taking the same position that sealed the fate of akkoben arbenz he's has wants nothing to do with the cold war and he's establishing peaceful and friendly relations it's the same thing with the soviet union in the communist world same thing that would cost allende his life reaching out to the soviet union this was an absolute prohibition in the eyes of the national security establishment if they had removed if they removed these foreign presidents and prime ministers including mosaddegh because they were making nice with the communists what would you expect them to do with a u.s president that was doing the same thing from within now kennedy knew how to throw down a gauntlet it is at this point that he declares war against the national security establishment he knows exactly what he's doing he he gives his famous peace speech at american university june 10 1963 it was a total ambush he didn't consult with the joint chiefs of staff

[00:54:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=3241s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=3241s)

consult with the joint chiefs of staff before he did this he didn't consult with the cia he kept it top secret among his speech writer maybe one or two aides and he appears at american university you know at their graduation ceremonies this innocuous speech and then he throws the gauntlet down he starts the war with the national security well he he formalizes the war with the national security establishment he declares there an end of the cold war he says you know what we don't need this uh that that you know we fought in world war ii with the soviets we got along sure okay we different philosophy and ideology but he says we can we can compete in that area peacefully we can we can cooperate in other areas later he he even proposes a joint rocket ship trip to the moon which means sharing rocket technology with the commies but he's a very profound speech khrushchev shared it all had it broadcast all across the soviet union it was the first time that it ever been done it was reprinted in the in the soviet you know government press the kennedy says look you know in the final analysis we're all mortal we're human beings we all die we have children we don't need this we don't need to be so close to nuclear war here uh as as close that they had come so he says we're going to establish peaceful and friendly relations interestingly enough khrushchev was on the exact same page they were now communicating as as part of like comrades to to bring this thing to an end and kennedy didn't stop there he then proposes a nuclear test ban treaty now that here that the military had been exploding nuclear bombs to test them sort of like you know north korea does with their underground testing and the the air was being polluted as you can imagine with these nuclear bombs exploding regularly and the military's position was we've got to oppose this treaty kennedy proposed a treaty with khrushchev let's just ban all above ground testing because the soviets were doing the same thing and uh the military was livid how can we

[00:56:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=3361s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=3361s)

and uh the military was livid how can we win a nuclear war if we're not testing our weapons and uh so they and the congress is the same position i keep in mind here now kennedy is ahead of the curve now he is a a um he's no longer pretty much a standard cold warrior he's no cold warrior at all but the rest of the country is and he's he's achieved the breakthrough but nobody will very few people have if anybody certainly congress hasn't so they're opposing this this test man treaty they're going with the military the military's putting the pressure on congress so kennedy realizes he can't get this thing passed he needs two-thirds vote in the senate to approve it so he goes on the road and he starts giving speeches to people and he starts talking about how we need to establish this peaceful world without this cold war and he hits a cord and you know people had you know they were coming to the realization they had beat the nazis and then all of a sudden they hit with this cold war and national security state assassinations coups regime change operations nuclear war they were tired of it they wanted a normal society again and so they started responding positively to this message kennedy was striking accord so the american people put the pressure on congress we want this thing enacted we're supporting kennedy on this and uh much of the shock of everybody and so that's how the nuclear test ban treaty got established i mean the numbers just flipped over because of this public pressure so kennedy also says he's going to withdraw out of vietnam now he he wanted to do it immediately but okay the 64 elections coming up barry goldwater was going to be the nominee for the republicans he knew what they were going to hit him with especially with the bay of pigs and the deal he cut with khrushchev over cuba that he was a communist appeaser weak on communism so he figured if he if he ordered a full pull out immediately out of vietnam of these ten thousand eleven thousand advisers that they would hit him with everything you communist appeasers and especially if the communists ended up taking over vietnam

[00:58:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=3480s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=3480s)

vietnam so kennedy's told close aids okay politically i can't do it i gotta win that election first but i'm ordering a thousand out and after the election i'm pulling them all out because some were dying some of these advisors were dying naturally enough they were advisors but they were still getting killed and can be anguished over this uh well the pentagon drags their feet on this order for about a year after he he ordered him out then he sends emissaries to fidel castro it's to say hey let's reestablish relations here you know americans can now travel to cuba no more embargo spend money there freely uh so he wants to normalize relations to cuba you can imagine how that goes over with the pentagon and the cia um this is get this imagine what the reaction of the pentagon the cia are to this he sends this message through an emissary jean danielle french journalist to fidel castro and where he says there is no country in the world where economic colonization humiliation and exploitation were worse than in cuba in part owing to my country's policies during the bautista regime i approved of the proclamation that castro made in the sierra maestra where he justifiably called for justice and especially hearing to rid cuba of corruption i will go even further to some extent as though batista was the incarnation of a number of sins on the part of the united states i am in agreement with the first cuban revolutionaries that is perfectly clear imagine their reaction so he's making nice with this communist in cuba imagine what their reaction must have been it is my conviction that at that peace speech the determination was made this man is a grave threat to national security and all of this confirmed it the nuclear test ban treaty this message to castro making nice with castro it was time to do a regime change just like in in mostadec's case arvin's case uh castro's case and later uh salvador

[01:00:02 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=3602s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=3602s)

castro's case and later uh salvador allende now there was a woman that that kennedy was having an affair with in 63 interesting woman her name was mary pincho meyer very prominent woman in pennsylvania her father was very a big wig in pennsylvania politics she had known kennedy in college they hadn't dated she ended up marrying a guy named cord meyer who had had lost an eye in combat in world war ii and the two of them this whole story is told in a great book called mary's mosaic by peter janney which i highly recommend but mary meyer and kordmeyer her husband had become leaders of the peace movement international peace movement after world war ii you know the horrors of world war ii and world war one there were people that said never again and so they were establishing international peace movements he was the leader of some group i think it was like the world peace federation something like that well he ends up going

to the dark side the cia apparently he thinks that that's the way to get peace and she knew better i mean she knew that the cia was was the exact opposite of a peaceful world and that i think that undoubtedly contributed to the demise of their marriage but they'd also lost a child in a traffic a tragic traffic accident that clearly contributed to the demise of their marriage but in any event in 63 she's divorced and she's kind of your original hippie before the hippies came into prominence she's living in the uh in the uh georgetown section of washington dc she's an artist she takes nature walks every day she's smoking dope regularly she's she's uh ingesting lsd she was good friends with the lsd guru at harvard uh timothy leary and she's having an affair with john kennedy and it's virtually beyond any doubt that she had an influence on him with respect to this peace uh breakthrough that he achieved that it by all accounts according to jenny

[01:02:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=3721s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=3721s)

all accounts according to jenny kennedy fell in love with her and if that's the case then it's unquestionable that he would have been talking to her about what he was doing what his plans his peace speech and so forth this is what mary meyer says right after his assassination she calls timothy leary they couldn't control him anymore they okay he was changing too fast he was he was he was no longer a cold warrior they've covered everything up and they had i'm afraid she was deathly afraid because if a group is powerful enough to eliminate a president they're powerful enough to eliminate her and there were other people that had that same fear so what we're looking at here is a conflict of visions and they're irreconcilable visions one is a peaceful and friendly relationship with russia china cuba and the rest of the world plus implicitly astro gastrics the restoration of a limited government republic which means a dismantling of the national security state and clearly the national security establishment knew that that was the implicit implication of what kennedy was doing no cold war that was the justification for converting america to a national security state the argument was that if the soviet union has the power of assassination and regime change and coups and torture we've got to match them and that as soon as the cold war is over america could get its limited government republic back versus versus perpetual war and conflict forever wars plus the continuation of an ever more powerful national security state there you've got your conflict of visions now kennedy knew how to throw down a gauntlet when he was starting a war this is what he did he threw a double gauntlet down this is what he does the very next night after the peace speech he goes on national television he he had to know exactly what he was doing and he gives a major civil rights

[01:04:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=3840s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=3840s)

and he gives a major civil rights address where he says that he's going to introduce major civil rights legislation in favor of african americans this is what later became the civil rights act of 1964. this was kennedy's proposal and so like about what he's doing not only is he making nice with the communists internationally he's coming to the defense of the domestic communists the domestic enemies that the cia and the pentagon considered were communists double gauntlet here now did kennedy understand the danger that he was facing here with the national security establishment there can be no no question he understood fully what he was doing here by taking on this powerful powerful branch of the government um he had he he had heard the the farewell address of dwight eisenhower now dwight eisenhower was a career military man graduate of west point supreme allied commander of all the allied forces in world war ii if there was anybody that knew the military backwards and forwards inside now it was dwight eisenhower he gives this shocking farewell address right before kennedy's coming into office shocking he says okay we've got this different form of governmental structure he called it a military-industrial complex it was a another name for the national security establishment or national security state deep state that's the name people use now for it and he says the cold war has required this change in governmental structure this is what kennedy was now challenging but he says we need to be real cautious here because this is a very very dangerous structure we have here we must never let the weight of this combination endanger our liberties and our democratic processes he's saying that about this governmental structure kennedy hears this now he wasn't the only one 30 days after the kennedy assassination former president harry truman who's the father of the national

[01:06:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=3960s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=3960s)

who's the father of the national security state just says eisenhower howard understood the military truman understood the national security state inside out because he's the one that brought it into existence including the cia he writes an op-ed that's published in the washington post that says there is something about the way the cia has been functioning that is casting a shadow over our historic position and i feel that we need to correct it it could not have been a coincidence that this is 30 days after the kennedy assassination he saw the ear marks clearly saw the earmarks of a cia operation here because he understood how the cia operated and his point here was that when he brought the cia into existence he thought he was just going to be an intelligence gathering agency and instead he becomes this agency engaged in assassination coups covert operations and he said this is really damaging to the united states and i'm not the only one that saw the parallel here alan dulles the man who kennedy had fired he goes and visits truman after this op-ed appears and immediately after and pleads with him to withdraw it cancel it get it off there and truman to his everlasting credit said absolutely not now a close friend of kennedy a man named redfay he actually asked kennedy directly do you really think a coup is possible in this country jack jack says yep it's possible it could happen in this country and he gives a scenario where a president is deemed to be weak on in national security now kennedy had read a book called seven days in may that posits exactly what we're talking about where the military is faced with the president that his policies are taking the country down and that there's only one way that they can save the country and that's through a military takeover a la chile asterix astrix with the full support of the u.s government or the u.s national security establishment in chile astrix asterisks this is this is what's posited in this book seven days in may and kennedy loved this book

[01:08:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=4080s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=4080s)

this book well he decided that this book should be made into a movie as a warning to the american people the same thing that eisenhower had done with his farewell address kennedy's issuing a warning saying this apparatus is a grave threat to our democratic process he's here and so it's made into a movie it's about to be released on the like the day of the assassination and a little awkward so they delayed the release for a couple weeks or three weeks or so but it's a fantastic movie if you've never seen it i highly recommend it it stars burt lancaster kirk douglas frederick march ava gardner it's a very exciting movie the seventh day when the head of the joint chiefs of staff dared the president of the united states to stop the conspiracy that couldn't be proved you're not a weak sister mr president you're a criminally weak sister you're a weak sister mr president you're a criminally weak sister and that's exactly how the pentagon the cia viewed john f kennedy he was weak he had shown weakness cowardice at the bay of pigs by not sending in that air support he had shown weakness and not invading cuba when he had the chance by not accepting the operation northwoods by cutting a deal that gave this communist regime total control permanent control over cuba he was a criminally weak sister in their eyes but he was worse he was a traitor this is the flyer that was flying around congress uh dallas on the day of the assassination now it wasn't it wasn't prepared by the pentagon or the cia it was prepared by right wingers and of course that shared the same sentiments as the pentagon and the cia and it reflected their sentiments he's turned the sovereignty of the us over to the communist control united nations he's betraying our friends cuba and

[01:10:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=4200s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=4200s)

he's betraying our friends cuba and befriending our enemies russia yugoslavia poland he's wrong on numerous issues the the berlin wall the missile removal cuba weed deals kennedy had sold wheat to the to the soviets because they were starving to death there the test ban treaty etc he's been lacked in enforcing communist registration laws he's given support and encouragement to the communist inspired racial riots he has illegally invaded a sovereign state with federal troops they're referring to james meredith and the integration of the university of mississippi so they looked at kennedy not only as a coward weak but also a traitor this is when they determined at that peace speech that they needed regime change there's no question in my mind that that's when the determination was made and all of the things that were coming afterward we're saying we're right to to pursue this regime change in order to save the country on national security grounds the same reason they were they were ousting arbars from power castor from power most attacks from power and later allende to protect national security here's the plot now you have to expect the

plot to be very very brilliant remember these are ivy league graduates they're specializing in assassination they're brilliant people they've had 15 years specializing in assassination you're not going to find a simplistic plot here i guarantee you a simplistic plot would have been broken open wide open very easily and and led to the plotters the national security establishment uh the pentagon and the cia here's the plot it involves two important elements the first element is brilliant the second element is ingenious the first element is the plot is frame a communist have a communist patsy here the second one the ingenious one is come up with a way to immediately shut down this investigation so that with no investigation it obviously

[01:12:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=4320s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=4320s)

with no investigation it obviously cannot lead to the national security establishment okay why a communist why frame a congress well this was this was the cold war i mean nothing worse could happen to a person than to be a communist in the united states okay when when america was a limited government republic it was legal to be a communist you could join the communist party first amendment you could have a communist party you could run for office of the communists after it's converted to a national security state everything changes now it's technically still legal but it's a practical matter you are dead me if you're economist why because you're now part of the enemy force this is a communist conspiracy to take over the united states you are now a fifth columnist remember world war ii when the japanese attacked pearl harbor what they do with japanese americans here they rounded them up a great threat to national security that's why they were set dead set on smearing destroying any communists here in the united states they were now considered part of the enemy force so you remember the mccarthy hearings are you now or have you ever been a member of the communist party people were scared to death if if they answered yes they'd be fired from their jobs they couldn't get new jobs they couldn't support their families the smear was so effective and so terrifying if they lied they were subject to perjury prosecutions the uh if they took the fifth amendment they were considered automatically guilty uh they were looking for communists everywhere state department hollywood they had the hollywood blacklist they went after dalton trumbo and the hollywood 10 a screenwriter uh i mean trumbo could not earn any money because nobody would hire him as a screenwriter because he had communist connections in his past what he was doing was secretly writing screenplays and giving them to other screenwriters who were taking a big risk and then they would put it under their name and then share the money with trumbo that's how bad things were so by framing a communist you guarantee that nobody's going to come to his

[01:14:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=4441s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=4441s)

that nobody's going to come to his defense nobody i mean certain people would be too scared to in fact one of the first people that was challenging the official story that lee harvey oswald a communist had killed the president was a a man named mark lane he was a new york city lawyer he said this is a little too pat this whole official scenario and he starts challenging it what do they do they immediately label him a communist sympathizer and they start following him and monitoring him sending a message anybody that comes to the defense of this guy is going to be labeled a communist uh conservatives would never come to the defense of a communist conservatives hate communists but what's fascinating is neither did the left you had high leftist intellectuals that immediately just clammed up steal their lips or even worse you know said we stand with the official version we don't care how bad it is count us in because they were so scared of being smeared as communist sympathizers remember this was a scary time this is like right after 9 11 or right after the oklahoma city bombing is it right after the assassination of a president and the communists being accused of killing the president even today leftist intellectuals are scared to death to talk about the kennedy assassination i mean not even the arden supporters of civil liberties will talk about the kennedy assassination like why were you why were they questioning without a lawyer and things like that why well not because they're they're afraid of being labeled a communist that's pretty you know respectable these days but because they're afraid of being labeled a con a conspiracy theorist which now is almost as bad as being labeled at the communist sympathizer back then maybe even worse and and what had happened was that as more and more people were questioning the official version in the 70s and 80s the cia sent out a message

to their assets in the mainstream press saying we're now ready to go into the next next phase of this operation when people question the official version smear them as a conspiracy theorist that that propaganda campaign originated

[01:16:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=4561s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=4561s)

that that propaganda campaign originated with the cia but it's one of the most effective propaganda campaigns in ci history people are scared to death in today's times including people in the libertarian movement i mean they'll talk about mosaddegh and the regime change there and allende and arbenz they won't touch the kennedy case none for fear of being labeled the communist sympathizer and the same applies to leftist intellectuals today you can find the most ardent defenders of civil liberties among the left they have airbrushed washed out of their minds the kennedy assassination they never even mentioned it's like it didn't happen now the problem is how are you going to frame a communist that's a big problem because when you frame somebody he's got to be at the right place at the right time right well that's difficult to do you know how are you going to make sure that the communist is the right place at the right time over the sixth floor of the school book depository in texas and uh and that he's not going to go out on the street and watch the parade where he can be photographed it's impossible i mean they could go to a communist in new york city or something and say hey we got this job for you at this great school book depository in dallas how would you like to go down there but you know no no communist is going to fall for that so what they end up doing is they do the next best thing they frame an intelligence operative whose cover who's been trained to be a communist to act like a communist and they were doing this i mean they were training agents to pose as communists that's how they were infiltrating the communist party they were infiltrating organizations leftist organizations like the fair play for cuba committee which was this big uh leftist organization socialist communists but also very prominent people had joined this this organization is very renowned in the country they were just upset at how the us was treating cuba including this brutal embargo against the cuban people well they were infiltrating that organization too and they were infiltrating agents into the soviet union to find out what was going on there well obviously in order to do that they have to train an agent

[01:18:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=4680s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=4680s)

have to train an agent to pose as a communist you know somebody can't just go to communist party headquarters and say i'd like a job and then they say well what's your take on karl marx's labor theory of value and he says i don't know what that is and they're going to say get out of here and give give our friends with the cia and fbi our best no they've got to have a communist that's well trained well educated in communism so that he's believable when he goes in there and infiltrates these organizations and acts like he's one of them well at one of the first meetings of the warren commission which was the commission charged with supposedly investigating this assassination it may have been the first meeting uh earl warren the chairman of the committee calls the commission together in a top secret meeting this is top secret classified meeting and he he tells the commissioners i've got some really discomfoting information that appears might be reliable which is why he was bringing it up it the information was that oswald was working for u.s intelligence in the fbi well you can imagine this creates lots of consternation warren says how are we going to handle this is this is true this is very very discomfoting well what they decide to do is simply ask the cia and the fbi whether this is true and if they admit it then they'll deal with it if they deny well they'll go on and so they ask them and they say no he never worked for us and that was the end of it i mean no they would never lie about such a thing so warren says well that's the end of it and he tells the commissioners this information will never be released this meeting will never be released to the american people they must not learn about this information and he tells the court reporter destroy your notes on this thing and it got out i think she had forgotten to destroy her tape recording or something like that it ultimately became public well i mean you know everything points to the fact that this information was totally reliable you know a communist marine how many times have you ever heard of a communist marine

[01:20:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=4800s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=4800s)

marine i mean communists hate marines communists kill marines marines hate communists marines kill communists they just killed what like over a million communists or whatever the number was in the korean war which was just a few years before uh so oswald's going to join as a communist join the marines where he could get stationed in korea where the war could resume because there was ever a peace treaty where he would be killing his fellow communists i don't think so now they said well you know he was a marxist in high school he was studying marxism but what they don't tell you is that his favorite tv program is a youngster was a tv program called i led three lives and what that program was about you can see segments on youtube is quite an interesting program to watch that it was about a an fbi agent whose job it was to pose as a communist to infiltrate communist cells all across america remember this was the cold war there were communists everywhere congress the army hollywood and one right weaker even said that eisenhower the president was a was a overt or covert agent of the of the soviet union so they were looking for communists everywhere and so this guy in this television series was infiltrating these cells on a weekly basis and then he bust one cell and he go to another cell the next week always posing as a communist well this was oswald's favorite program so he studies marxism in high school he joins the marines simper faye and zipper phi and all that and then he's studying he's becoming fluent in russian speaking russian in the military how do you do that you can't become a fluent speaker in a foreign language just by studying books it's impossible you have to talk to somebody in that foreign language well they have tutors in the military they have language schools in the military but oswald was studying russian and marxism while he's in the military to such an open extent that his his buddies in the military in the marine corps were calling him osvaldovich imagine that i mean osvaldovich what are the odds are that at the height of this

[01:22:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=4921s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=4921s)

the odds are that at the height of this cold war where they're looking for communists everywhere and they're targeting communists the rosenbergs the the dalton trumbo the communists everywhere mccarthy hearings that they're going to let an osvaldovich remain in the marine corps i mean they would call him in let's get to the bottom of this because he could be giving troop movements and troop capabilities to the communists in the soviet union he they stationed him at atsugi air force base in japan which where the top secret u2 spy plane is flying out of flying over the soviet union illegally to take photographs now he stays there in the soviet union for a couple of years he marries a woman who has connections through an uncle to soviet intelligence and then he decides he's going to come back to the well no i'm sorry i skipped a step he gets out of the marine corps and he decides to defect to the soviet union so he goes over to the soviet union nobody knows how he got over there he got the money for it because he was broke when he left the marine corps and on the way over there he stayed at this luxurious five-star hotel nobody knows how he paid for that but he arrives in moscow and he goes to the u.s embassy and he publicly declares in a very loud voice and of course everybody knew that the embassy there was being eavesdropped on by the by the soviets i'm defecting to the soviet union um i don't like the united states anymore and i'm giving up all the secrets i learned to the communists whoa now you're talking about some serious business because here now he is promising to give up classified information that he learned as a us marine that's treason no question about it serious stuff here he's not just affecting he's doing something much worse ostensibly he stays in the soviet union a couple years he comes home with his wife who has connections through an uncle to soviet intelligence and we know what's going to happen to him when he gets home there's no doubt i mean look look how they treat edward snowden i mean snowden didn't give up secrets to the soviets he just

[01:24:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=5040s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=5040s)

the soviets he just disclosed publicly the the national security state's dark secrets and look what they've done to him look at julian assange they charged him with this ridiculous espionage law from world war one why not for giving up secrets to the soviets but just for publicizing disclosing the dark side secrets of the national security establishment this is a man who ostensibly has given up secrets to the to the soviets the enemy this is the height of the cold war we know what's going to happen to him they're going to grab him they're going to waterboard him they're going to torture him they're going to send him Guantanamo Bay all of the above right no they give him the red carpet treatment there's a group called traveler's aid that that lends him the money

to come home because he didn't have enough money to come home traveler's eight has connections to the state department then he he comes home they do not even subpoena him to a federal grand jury so all they had to do serve him with a subpoena put him before a grand jury what are the secrets you gave up nothing you have this weird parallel universe you have the cold war going on here where they're prosecuting all these communists and going after them and then over here a parallel universe where this self a bad communist who is supposedly betrayed america is sauntering across the this cold war stage of history with nary a touch he gets to dallas he gets a job get this in a photography lab that is developing photographs on a top secret basis for the national security establishment this is osvaldovich is doing this working in this lab he establishes a close relationship with a mentor named georgia de mourinho who had cia written all over him when he goes to new orleans a couple months before the assassination he gets a job with the riley coffee company that is owned by an arden right-wing conservative what a conservative is going to hire a self-availed communist at the height of the cold war and then he was distributing flyers for the fair play for cuba committee which i

[01:26:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=5160s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=5160s)

committee which i i talked about earlier he was doing things for the fair play for cuba committee without their authority without their permission he just said i'm going to be doing this these things on your behalf whether you like it or not and he was distributing these flyers let me give you an example there's a this is a giant screw-up oswald must have gotten balled out for this notice on this flyer on the left he's got 544 camp street as the as the address well 544 cam street turns out to be the side entrance of the office of a man named guy bannister who is a retired fbi agent that is working with the cia to run guns into cuba to oust castro and witnesses placed oswald inside banister's office now he must have gotten balled out because over here look at the flyer on the right it's now got 4907 magazine street which is totally different i don't know what looks at that street in any event oswald while he's in new orleans makes it a point to go make contact with a group called the dre now the dre was a group of cuban exiles they were based in miami and new orleans that was absolutely committed to ousting castro from power so oswald goes and makes contact with him and he talks with the head of the organization in new orleans a man named carlos springer the very next day oswald's passing out his flyers after they've had this this meeting he's passing on his fair play for cuba committee flyers and bringier comes out and and accosts them and say i dare you you uh castro lover you cuba lover you didn't tell me this yesterday and and and oswald says go ahead and hit me carlos go ahead and hit me if you want and uh so they create this big publicized racket the cops come and they they break they bust them for disorderly conduct and oswald is thrown into jail he's the only one in jail while he's in jail he spends the night

[01:28:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=5281s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=5281s)

while he's in jail he spends the night in jail this the supposed nerd do well communist tells the jailer tell this fbi agent and i'd like to visit with him and so sure enough this fbi agent comes and visits with him they have like an hour or hour and a half long visit we don't know what they talked about but quite extraordinary and then after oswald gets out of jail bringer organizes a radio debate now i put debate in quotation marks because it was really more of an infomercial because they're they're on this radio programs being recorded and um bringier is publicizing all of oswald's communist background you defect of the soviet union you're a castro lover and all this is being taped and and of course oswald's saying yes this is all true of a marxist and so forth well take a wild guess what was the entity that first publicized lee harvey oswald as a communist after the assassination that would be the cia not overtly because that's not how they operate they did it through the dre because what nobody knew at the time was now the dre sends out this press release it's under their their banner they're stationary or whatever and they they advertise all of oswald's communist bonafides immediately okay now a communist has killed the president and this goes out all across the country the word is out the communists killed the country so now who's going to come to the defense of lee harvey oswald the communist thing has been set well what nobody knew at the time was that the cia that this was a front organization essentially for the cia they were generously funding it big money for quite some time

and that they were being supervised and monitored by a cia officer named george junitas don't tell this to the warrant commission now the warrant commission knows about the dre but they don't know about the cia connection here and the cia keeps it secret in the 1970s uh jones is retired by now

[01:30:04 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=5404s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=5404s)

in the 1970s uh jones is retired by now and he got a big medal for meritorious service we don't know what the meritorious service is because the cia won't disclose it but uh there's two the house select committee on assassination is now meeting in the 1970s what what they were about was that the american people into the 70s were not buying the official story it was just too packed for them and so uh the house select committee says okay we'll have a new investigation and so during this investigation there's two law students named hardway and lopez who are assigned the task of getting records out of the cia and specifically relating to oswald's ostensible trip to mexico city and at first the cia thinks these are just a couple of you know neophyte law students they don't know what they're doing but very quickly they figure out that the exact opposite these guys are very sharp and they know exactly what they're doing and they know what they're looking for and so the cia realizes there's danger here so they call joe anitas out of retirement and they tell these guys he's going to be a facilitator for you he's going to help you find the records you want when in actuality he became an obstruction he was a wall to make sure they got nothing else out of the cia relating to mexico city well they don't disclose the cia's connection to the dre and joe anita's connection to the vre to the house select committee then we go into the 1990s with the assassination records review board they don't disclose the same thing to the arb through during the entire four years they were in existence it wasn't until after the arb went out of existence that a former investigative reporter named uh jefferson morley discovers this the the dre's connection to the cia that it was essentially a front organization joe anitas was closely supervising him when this press release went out advertising that oswald was a communist

[01:32:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=5520s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=5520s)

advertising that oswald was a communist after the assassination so morley asked for joining us file and the the the cia undoubtedly freaking out says you're not getting anything we're not going to give you anything regarding joe anita's and they started fighting fiercely to protect everything regarding juanitas morley files a lawsuit under the freedom of information act that's the subject of our newest book at fff morley versus cia the cia fights him for 10 years or more fighting not to release any more information on joe anitas fiercely trying to protect the secret well when the the chairman of the assassination records review board learned about this he said you know this if we'd known about this there would have been quite a different position we had taken here i mean implicitly they might have called joe anitas to testify this is a federal judge named john tunham that was very dissatisfied when he learned that they had kept his secret from the arb that the the general counsel for the house select committee named robert blakey he was upset over this he said we clearly were misled by the by the cia he compared it to obstruction of justice which it clearly was but this was how oswald is portrayed as a communist this was the first part of the plan frame a communist now let's digress a minute here before we go to the to the ingenious part of the spot and let just look briefly at noted uh because they've never come up with a motive for lee harvey oswald never that the most they've been able to come up with is that he was a little man trying to become a big man by killing a big man that's what the mainstream press always cites there's a problem with that oswald denied he did it and he actually went one step further he says i'm being framed here so clearly he has some people in mind that are doing the framing that's what he meant when he says i'm a patsy uh if he was trying to be a big man he would have said i i just killed a big man i'm a big man too he denied it claimed he was innocent and and notice that the mainstream press

[01:34:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=5640s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=5640s)

that the mainstream press always frames the issue do you believe oswald acted alone or do you think he acted in concert with someone never never do they consider the other possibility that this was an innocent man who was being framed that which he was claiming that he was innocent and he was being framed they never considered that as a possibility now jfk's moved toward peace remember he gives us peace speech

we're reaching out to the soviet union we're gonna we're gonna settle this thing it's gonna be over no more cold war he's sending emissaries to castro no more cold war with castro cold war is over as far as kennedy's concern why would a communist want to kill a president like that and elevate a man like lyndon johnson who everybody knew was on the same page as the national security establishment makes absolutely no sense now let's go to the brilliant to the ingenious part of this assassination um all right this is how it was working they needed to shut down this investigation you know when somebody shoots a cop what happens well the air all the cops swarm in they're going to catch everybody involved in this this killing not just the guy that shoots the cop inside the bank everybody else is going to get prosecuted for murder the getaway driver the people who finance it and they're not going to stop till they get everybody involved we expect that it's normal it's a hundred times worse if you kill a federal official many years ago there was a federal judge in san antonio named john woods whose nickname was maximum john because he he always gave the maximum sentences in drug cases he was one of these federal judges that was going to single-handedly win the war on drugs in fact when i was a young lawyer down in south texas my dad and i he was a lawyer one of my first cases was with my dad representing a 20 year old guy before maximum john and it was a one count conspiracy indictment they had tried to get heroin he and two other of his friends that were both about 20 and uh they hadn't succeeded it was so

[01:36:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=5760s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=5760s)

and uh they hadn't succeeded it was so it was just a one count agreement indictment conspiracy and they got convicted and maximum jones gave him the maximum sentence they had no criminal record and hadn't been convicted of anything 15 years maximum sentence for each one of them well john wood got assassinated and the feds pulled out all the stops as you would expect them to do they eavesdropped on lawyer client communications to see if clients were confessing to the crime which is totally illegal but that's what we expect from them they're going to pull out all the stops in the 70s there was a federal agent in kiki kamadena that was brutally kidnapped and tortured and murdered in mexico the dea pulled out all the stops they went into mexico were kidnapping people torturing people they were determined to bring every single person involved in this killing to justice to send a message you're not going to kill a federal official we're coming after you so you don't ever do it again well you can imagine with a president all the stops are going to be pulled out the whole federal machinery is going to come crashing down including all the state machineries the national security establishment knows this this cannot be a simplistic plot they're not going to escape that kind of investigation so they have to figure out a way to shut this investigation down immediately so that it never can lead to them here's how they do it they have a communist that they're framing ostensibly firing from the rear that's oswald they also have people firing from the front now immediately after kennedy was declared dead two of the treating physicians at parkland hospital where they were treating him had a press conference and at this press conference they said kennedy had been shot from the front he had a little round bullet hole right here in the front of the neck they had done a tracheotomy there which was a thin slit line with a scalpel to put a breathing tube in he had a large exit wound in the back of his head so clearly he was shot from the front and these doctors stated this also there were countless witnesses that

[01:38:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=5880s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=5880s)

witnesses that went to the grassy knoll in the front after the shots were fired cops rushed up there the person saw smoke from that area there were secret service agents up there with secret service badges except that they were not secret service agents they were using fake badges because the secret service said we had no people up there so there were shots fired from the front as part of the plot now the sixty four thousand dollar question is if you're gonna fire up if you're gonna frame a guy fire in the rear why are you having shots fired from the front that's stupid right stupid i mean that's just dumb if you're gonna frame a guy firing from the rear you're going to make it look like he's the guy that did this then you have all your shots coming from the rear right that is the sheer ingenuity of the spot they've got people firing from the front on purpose is part of this plot and they know they know that okay they understand what they're doing well if they have shots firing from the rear by a communist then who could his confederates be firing from the front that's where mexico city comes into play this is the idea of sending oswald down to mexico city or somebody portraying oswald it

doesn't make any difference to mexico city you see they weren't just framing a standalone communist here uh you know a person that's majored in communism in some left-wing american university uh and it's not just a self-educated communist this is a communist they're framing with connections direct connections to the soviet union and cuba that's the idea of sending them to mexico city 30 days before the assassination he goes or somebody portraying him goes into the cuban and cuban embassy makes a big hullabaloo i mean like he's advertising he's there he wants everybody to take notice i want to go to the soviet union i want to

[01:40:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6000s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6000s)

to go to the soviet union i want to return home i want demand a transit visa for cuba and everybody remembers this guy because he made such a hullabaloo he goes over to the soviet embassy does the same thing supposedly meets with the head of assassinations in the soviet union who's there in the embassy and big hullabaloo i want to go to the soviet union so and of course the embassy both embassies are under strict surveillance by the cia and you would of course expect that uh so now this is not just a stand-alone communist this is a communist that has made connections a communist is defected to the soviet union who is who has stayed over there who has now come back and become an agent of the international communist conspiracy and they've worked together castro khrushchev have worked together to put this thing together and kill the beloved president of the united states john f kennedy well we all know what that means right we're talking about war this is an act of war how did it when the american people find this out that the communists have killed their president we know what's going to happen you're going to have 200 million people or whatever the population was in the united states demanding in mass retaliation well we know what retaliation means don't we i mean khrushchev and castro are not going to stand still so that some rifleman can assassinate him the only way to assassinate him is by bombing flattening havana or wherever castro is same thing with moscow you flatten it well we know what that means that means nuclear war now we're back to the cuban missile crisis but even worse much closer now to uh to nuclear war here because this is an active war they've killed the president united states the communists have not just oswald but as part of this this communist conspiracy and in fact we have evidence for this on on friday night of the assassination the police chief of dallas uh charges oddwall formally with an information legal document that that accuses him of

[01:42:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6121s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6121s)

legal document that that accuses him of murder but also part of international communist conspiracy which is logical because they got shots firing from the front the dallas trading doctors have said it all the witnesses verified it so lyndon johnson the new president gets on the phone immediately through an aide calls henry wade the the district attorney of dallas county friday night and says what in the heck are you doing are you trying to start world war three here get rid of that conspiracy indictment uh just charge oswald okay later when he's talking to earl warren now we don't have all of johnson's conversations recorded or witnessed to all of them but we have some of them when he calls earl warren and asks warren to chair what became known as the warren commission uh he's telling warren i need you here and warren says no i'm the chief justice of the united states i got a conflict of interest not going to do it he says to warren your country needs you just like it needed you in world war ii you don't have a choice here you have to do this to save the lives to help save the lives of a potential 40 million 50 million americans here he's alluding to nuclear war and he even mentions mexico city he mentions mexico city and then later in in a conversation with richard russell who is also being asked to join the warren commission he richard russell say no i won't serve on any commission that earl warns on i hate the guy i won't do it johnson says you're going to do it dick and i've already announced you're going to do it because you're going to do it for your country because we're looking at the prospect of losing 40 50 million americans here and i've already told warren that and you're you're coming on board too so you see they're bringing up this idea of this world war iii in order to shut this thing down and just pin the crime on oswald who at this point by the time

[01:44:02 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6242s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6242s)

oswald who at this point by the time he's talking to warren is dead but we're just going to pin it on him and we're going to let the rest go because we're not going into nuclear war here over this thing now here's the proof positive this is this closes the case on this scenario this is the deputy attorney general nicholas katzenbach this is november 25th 1963. this is three days after the assassination he sends this memo to bill moyers the public who is in the johnson white house the public must be satisfied that oswald was the assassin okay got to make sure that the public satisfied with that that he did not have confederates who are still at large how can he know that how can he know that three days after the assassination there's no possibility that he can know it a fierce investigation is going to take months maybe even years no maybe he's he didn't have confederates but you can't know that without a fierce investigation that lasts months or possibly even over a year he's saying we've got to assure the american people in other words the federal machinery the bureaucracy is now moving in the direction of oswald did this thing we've got to shut this thing down because we can't afford to go to nuclear war on this thing at the same time it was what the fbi director j edgar hoover started doing immediately he's directing the the assassin the investigation to to show that oswald is guilty here and his agents are picking up this real clearly they're very faithful to uh to to hoover that when hoover's moving in this direction the agents start moving and they start ignoring all the evidence that establish a shot was fired from the front the machinery is shutting down here because of this prospect of nuclear war here's the other big question suppose warren which he undoubtedly did russell anybody that's that's being fed this

[01:46:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6360s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6360s)

anybody that's that's being fed this line kassenbach says mr president just out of curiosity why are we going this road down this road why why not retaliate the communists have killed kennedy here we're going to give them a pass we give these communists a pass on this assassination there's no telling where they're going to stop you know i mean i don't want world war iii either but hey why should we give him a pass what do you think johnson would say he had to get the perfect answer he has the perfect answer let me tell you what he would tell katzenbach nick let me tell you something let me tell you about these kennedy boys these kennedy boys it turns out we're running a damned operation mongoose down there in cuba which called for sabotage and terrorism they were trying to get rid of castro out of there and their cia was running a damn murder incorporated down there in cuba it entered into an assassination partnership with the mafia repeatedly trying to kill fidel castro they weren't successful but they repeatedly were trying to do it and castro had told them if you don't stop i'm going to come after you in the same way and so these kitty boys end up got they got burned by the own their own fire that they started down there in cuba and if you think i'm going to nuclear war that's going to cost the lives of 40 50 million americans because of what these kennedy boys did in starting this fire against fidel castro that ended up burning them no siree no siree they got burned by their own fire and we got the red that did this from the rear he's now dead that's where he belongs but we're not going to nuclear war nick no we're not going nuclear world earl no dick we're not going nuclear over this kennedy boys are responsible for the plight this country finds itself in it's all true it's ingenious well what how could people respond to that i wouldn't want to go to nuclear war when the kennedy boys had started this assassination game remember castro had never done anything

[01:48:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6480s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6480s)

remember castro had never done anything against the united states in a criminal nature it's always been the u.s that is aggressive against cuba including the assassination attempts you want to go to nuclear war over that i don't think so now there's still one big obstacle they have here as they're shutting this thing down which of course now can no longer lead to them there's no risk of that and that's the autopsy all right now what's an autopsy well an autopsy is a medical procedure conducted by a pathologist who his job is to determine the cause of death it's so well ingrained in american jurisprudence i mean have you done this in the soviet union you could just bury the body or have a cremation without an autopsy they'd get away with it not here the national security establishment knew that if they did that people would be too suspicious and they would demand an exclusion and then there'd be a post-burial autopsy and and then the truth would come out so they they they decide they they there's gonna have to be an autopsy they can't avoid that but they can't

afford to have a correct autopsy you see because if they have a correct autopsy here's what's going to happen the pathologist is going to say well they're both fired from the front that's how that's how he got killed here or one of the reasons he got killed and as well as bullets from the rear and immediately the american people are going to find out it's going to be made public and then there you start the american people are going to demand retaliation well at this point the soviet union and cuba are obviously going to be saying we had nothing to do with us and they're in fact going to be pointing the finger at the national security establishment saying we're being framed here they are the ones who have done this and in fact the soviet union's investigation determined that it was a national security state regime change operation well once that happens the american people are likely to balk and say well wait a minute let's get to the bottom of this let's not go to nuclear war until we're sure and then you've got that your fierce investigation that inevitably is going to lead to the national security establishment so they have to have a fraudulent

[01:50:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6600s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6600s)

so they have to have a fraudulent autopsy that hides the fact that there's bullets fired from the front so that they can assure the american people that oswald is the only guy here so they're operating on two levels they're using the bullets fired from the front for the federal bureaucracy to shut down this investigation they're using the frauds in an autopsy to sure the american people falsely and fraudulently that there's been no shots fired in the front and there they can rest assured that they've got the communists and he's now dead and everybody's happy so it's easy to think that the fraudulent autopsies launched at bethesda in maryland it's not it's actually launched at parkland hospital in dallas here's what happened okay texas law requires an autopsy to be conducted in every homicide standard and the autopsy pathologist understands that it's got to be done very meticulously very carefully because he's going to end up testifying in the criminal prosecution he's going to be put under a withering cross examination by a sharp team of criminal defense lawyers they have to be very careful with the bullet fragments they find and then when the doctor pulls it out and handles it to hands it to a deputy sheriff they've got to initial it and then when they pass it to the custodian of evidence he's got to initial it and then every one of them comes to court and testifies those are my initials those are my initials because they have to establish what the law calls a chain of custody and if there's any break in that chain of custody that bullet is not admitted into evidence because the law recognizes the potential for fraud the planting of a bullet you you've got to have a good medical examination and dr earl rose was a very prominent medical examiner in dallas county very renowned very competent nobody had any doubts that rose knew exactly what he was doing so as soon as kennedy's declared dead his body is wrapped in white sheets it's put into this huge heavy ornate casket that a dallas funeral home had provided but earl rose says wait a minute i'm taking this body to conduct an

[01:52:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6721s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6721s)

i'm taking this body to conduct an autopsy and which texas law required him to do this was a homicide case under texas law it was not a federal offense to kill a president at this time so the federal government had no jurisdiction none the only people at jurisdiction was dallas county and so he's just following the law here at that very moment a team of secret service agents jumps into action and says you're not touching this buddy we're taking this body back to washington with us and this secret service team was headed by a man named roy kellerman now kellerman's an interesting figure in all this because he was in the passenger seat in the dower in the dallas limousine in which president kennedy was traveling when he got shot and as we all know it's the job of a secret service agent to jump over and cover the president with his body to protect him to give his life and and kennedy very well may have survived the throne uh kellerman sits here like a bump in the log never makes any effort to jump over and then kenny gets hit with the fatal shot in the head well now he's at parkland hospital saying you're not going to touch this buddy we're taking this body back to washington and roe says no you're not this is texas law this is a homicide i'm going to conduct this autopsy well kellerman's carrying a submachine gun and he starts screaming and yelling and so do all his team of agents and then he says we're i'm operating under orders here and rose says i don't care i'm not getting out of the way i'm doing this autopsy well then the team of secret service agents pulls their coat back it's back and they brandish their guns so it's clear now people there that witnesses were scared to death that the hospital personnel they

thought rose was going to get killed and bullets were going to fly around screaming yelling profanities and so rose wasn't armed and so he steps out of the way and they forced their way out prohibiting rose from conducting this autopsy now the mainstream press has always con carried themselves like this is all normal this is very abnormal

[01:54:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6840s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6840s)

normal this is very abnormal i mean you would expect law enforcement to work together they know there's going to be a criminal prosecution here right you would expect the secret service to say dr rose we understand you've got to do this texas law you do what you need to do we understand it's going to take a couple hours we will stand by we'll take the body after you finish so what happens here you are not going to do this we don't care what texas law says they get out of there they take the body to dallas love field now who was it that issued this order well the only logical person that could have done that was lyndon johnson who was vice president until the moment that kennedy's dead now he's the president there's no other reasonable possibility i mean who else would issue sudden extraordinary order uh you know the head of the the secret service why would he do it hey guys i want you to stop rose from conducting an autopsy why would he do that johnson's the only logical culprit here and in fact there's corroborative evidence conclusive corroborative evidence he goes to love field where he gets onto air force one and he orders them to start removing seats in the back of the plane to make room for the casket so he knows the casket's coming the only way he can know that is because he issued that order now johnson's role in this is very intriguing and very revealing when when kennedy's hit they're in dealey plaza he's taken to parkland hospital and the uh johnson follows and he's in a different car he goes to parkland hospital too and he waits there until kennedy is declared dead while he's there he tells somebody you know this could be this assassination the first step in a nuclear attack by the soviets ah so now you have the first instance of the world war 3 scenario being brought up by lyndon johnson as soon as kennedy's declared dead johnson gets in the car and starts heading to dallas love field on the way there he scrunches down in the seat gets on down on the floorboard and says i could be ambushed by the

[01:56:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6960s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=6960s)

and says i could be ambushed by the communists this could be the first stage of a nuclear attack and he's perfectly right i mean right i mean if there if it is you know darn well the nuclear missiles are coming in in dallas because they want to decapitate the government here where they can't retaliate with nuclear weapons okay reasonable the problem is that when kennedy gets when johnson gets to love field his actions belie his his supposed concern the exact opposite he he first of all commandeers air force one his plane was air force two the kennedy plane was air force one there was no reason for him to take air force one uh the plane was the planes were duplicates of each other with respect to everything communications and so forth but he's the president he takes over air force one but then he orders his his aides to transfer the luggage from air force two to air force one transfer the luggage are you kidding me the nukes could be flying in mr johnson that's what you just said so his actions of lala gagging reflect that he had absolutely no concern that this was a soviet attack i mean if there's even a one percent or quarter percent chance he's gonna get up in the air immediately he's not even gonna go to parkland hospital if that if that chance was there go immediately to love field get up in the air and direct america's defenses to this nuclear war he's lala gagging he's acts like the man who is absolutely certain that this could not be a soviet attack how could he be that certain in fact he goes and tells his age that he wants a federal judge to be sought out in in dallas to to swear him in while the nukes are coming in he's worried about getting sworn in bobby kennedy the attorney general had already told him you don't need to be sworn in that you're automatically the president and he was but you see he's buying time he's buying time for that casket to arrive there

[01:58:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=7081s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=7081s)

time for that casket to arrive there and in the meantime he is showing no concern for a nuclear attack none he's very certain that this can't be the soviets how can he be that certain so the the casket arrives there they load it on the back of air force one they take off and they go to andrews air force base now at this point okay you can turn over the the body to to the local coroner medical examiner there in maryland that's not what he does he turns it over to the military now this is another area where the mainstream press has always said that this is normal how can it be normal this is supposed to be a civilian nation this is supposedly on loan nothing's killed the president what's the military have to do with this but can johnson turns it over to the military and everybody acts like well this is totally totally normal that the military is conducting this autopsy well he turns it over the to the military for obvious reasons the military keeps secrets they can classify operations which they did with this autopsy they made participants swear to secrecy they had to sign secrecy oaths written secrecy oaths they were threatened with prosecution criminal prosecution and court martial if they ever talked about what they had witnessed and uh and then military officials follow orders they they defer to authority that's that's the role of a soldier you obey orders so johnson turns it over to the military now here's what happens uh that they have to hide the fact that shots are fired from the front so so the pathologists are clearly read into their mission here your job is pathologists we need you to hide the fact of shots fired from the front so when the autopsy report is reported that assures the american people that there's just one assassin nothing else to see here folks keep moving on well the assassination records review board in the 1990s discovers the existence of a marine sergeant named roger boyaji oyajin tells an extraordinary story he tells them i was the marine sergeant at the time in

[02:00:02 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=7202s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=7202s)

i was the marine sergeant at the time in charge of marine security at the morgue where the autopsy was conducted in other words they were their job was to keep unauthorized people out and he says they brought in the president's body in a cheap shipping casket into the morgue at 6 35 p.m now the official entry time of the body in the dallas casket is is 8 p.m what happens is air force one lands at anders air force base on the left side of the plane the dallas cat casket is offloaded that's where everybody's standing lights are there press is there it's put into a gray navy vehicle mrs kennedy gets in there bobby kennedy who has met her gets in there and she starts proceeding slowly over to the bethesda naval medical center for the autopsy what they don't know is that this casket's empty okay because the body at some point along the line here has been shifted into a cheap shipping casket the type where you ship bodies in and boyajian establishes this and so we asked the arb would you like to see a copy of my report what this guy kept a copy of the report that he did an onion skin carbon copy of the report that he prepared 30 years before this is one orderly marine the arb says send us the report and there it is charge of security body brought in a shipping casket 6 35 pm in other words it was brought in almost an hour and a half early as compared to the official entry time now as soon as you know this you know there's bad stuff going on i mean you know they're not sneaking a body in here early for just innocent reasons there's something bad is going to happen here because they're one thing they're breaking the chain of custody on the body right okay now you also have other people corroborating this there are navy sailors now what happened was this team of navy sailors was was ordered to offload the the casket to carry it in the morgue well it comes into

[02:02:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=7320s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=7320s)

well it comes into into the bethesda morgue area in a black limousine that where men in suits got out dark suits blue blue or black suits they get out of this vehicle and uh nobody knows who they were but they say here's here's the the casket so it's a shipping casket this team of navy soldiers carries it in and they established that uh that they did that then there was surgical assistant paul o'connor participate in the autopsy surgical assistant james jenkins both of whom established that the body came in early they were corroborating witnesses in fact one or both or i think maybe it was a guy named gerald custer can't remember exactly whom but one or two of them were on the main floor when x-rays were being taken to president kennedy's head and they saw the limousine arrive the grave the gray limousine they saw mrs kennedy come into the building so they knew that the dallas casket out there had to be empty because the president's body was in the morgue getting x-rayed uh then the arb also discovered a an official report from

the galler's funeral home this is the most prestigious funeral home in in washington they did the embalming they did the funeral the ms i presume mrs kennedy selected them they the arb discovered a report that said president's body brought into the morgue in its shipping casket as compared to the heavy ornate dallas casket so they bring the body in almost an hour and a half early clearly they have a mission here and that mission is to alter the body so that it appears the shots did come from the rear there's no other explanation for bringing the body in early there's also witnesses that establish that inside the shipping casket the president was in a body bag a zipper body bag rather than the white sheets that they had been wrapped into in in dallas the these witnesses included the mortician for galler's john von hoison paul o'connor assistant autopsy photographer floyd riebe x-ray technician gerald custer and navy

[02:04:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=7440s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=7440s)

x-ray technician gerald custer and navy commander james stover but here's the case closed clincher of all this corroborating evidence here uh that's dr pierre fink now fink issues what's called what the law calls an admission against interest because he's one of the people here that are accused of wrongdoing an admission against interest is aching to a confession but it's a little variation here on how admission against interest works but the law considers it very credible because it's being made by the person who is being suspected of the wrongdoing in 65 pierre fink issues a report to his commanding officer on the autopsy he's one of the three autopsy physicians uh the other two were were commanders boswell and and humes and then in 1969 fink testifies in the trial a criminal case involving a man named clay shaw who was being prosecuted in new orleans in this statement and in this sworn testimony hume's estab i mean think establishes that commander humes called him at 8 pm which remember is the official entry time when the the dallas casket with the body has now been put back in there everybody thinks that's the first entry time of the body that's the official entry time he calls fink at that moment eight o'clock as the cask is being brought in supposedly for the first time and says we'd like you to come down and help us with the autopsy and asterix asterix we also have we already have x-rays of the president's head that's what's called an admission against interest because you see there's no way for them to have x-rays of the president's head when the body is being brought in for the first time at 8pm when the phone calls being made it's a major slip-up the only way that he can have x-rays of the head was if the body had drive there early which it did because these other witnesses were establishing that x-rays were being taken to the president's head but here's one of the autopsy pathologists that's establishing that

[02:06:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=7560s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=7560s)

pathologists that's establishing that case closed now fink also gives another fascinating part of testimony at the clay shaw trial now the clay shaw trial was a criminal case brought against a man named clay shaw by a district attorney in new orleans called jim garrison garrison was alleging what we're talking about today that this is a a national security state regime change operation the kennedy assassinations carried out by the national security state and he's prosecuting shaw as being on the peripheral edges of this conspiracy during this this case fink is called as a witness for shaw the defense calls it and so the prosecutor is cross-examining him and he says why didn't you dissect the neck wound where the little hole was with a little slit there where they did the tracheotomy and think starts hemming and haunting talking and hemming and haunting won't answer the question and the prosecutor keeps asking the question so finally the prosecutor you know faint obviously thought he was going to get off the hook by filibustering and prosecutor wouldn't have anything of it it's a sharp prosecutor he turns to the judge and says judge would you order him to answer the question and so fink finally answers the question and he says well he was ordered not to dissect the neck wound now he's the pathologist the pathologists are in charge of an autopsy here is somebody he says he doesn't remember who to this day we don't know who it is that was ordering him don't touch that wound now why do you dissect a wound on the neck you cut it open to see the bullet trajectories or maybe find the bullet maybe it's still in there if it hasn't transited don't touch that wound now the reason this is so revealing other than the obvious reasons is that you obviously have a deeper state force you're operating

within the deep state because somebody is obviously orchestrating this whole thing bringing the body in this lit this this hearse where the men in suits are there offloading it then all of a sudden orchestrating what happens in the hour and a half before the the autopsy officially begins and then

[02:08:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=7680s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=7680s)

the autopsy officially begins and then when the official autopsy begins monitoring it supervising and controlling the autopsy what is that deeper state for us it's orchestrated notice to this day we don't know now one of the interesting things about this autopsy is there this is friday night of the assassination nobody nobody ever expresses any concern as to what what they're going to do in a criminal case you know darn well in the criminal prosecution the defense lawyers are going to subpoena everybody involved in this thing right i mean they're going to they're going to tear this thing apart from detail to detail to detail nobody's ever saying what are we going to do about bringing this body early when we're asked in a criminal case whether we did this how are we going to handle not dissecting the neck wound nobody asks that you know why because nobody's worried about a trial and it's real clear that nobody including the people saying don't dissect that neck or worried about a trial that's it can only be one reason for that they knew there was never going to be a trial lee harvey oswald was a dead man walking he was still alive at this point but as a friday night he was a dead man walking they knew he was there was never going to be a trial so what are the wounds they have to alter they gotta alter the neck wound right okay that's that's a little round hole now when a bullet enters the body it enters as a as a little uh round hole and then it's pushing mass in front of it so if it exits it's going to exit as a blowout wound and then they got to alter the head wound so let's look at the neck wound now that's the neck one does that look like a little round hole to you now this is what the dallas doctor said that let me tell you something about parkland hospital parkland hospital is one of the most renowned hospitals in the state of texas probably in the country because it specializes in trauma cases these doctors are all trained at parkland to handle gunshot wounds that's your specialty i mean if you ever get shot by a gun and you're near parkland you're lucky john kennedy was lucky to be at parkland

[02:10:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=7800s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=7800s)

be at parkland because that's their specialty gunshot wounds they know how to do a tracheotomy dr crenshaw said all they did was a thin straight line now remember they're treating the president united states here there is no way crenshaw said that we would ever do a tracheotomy that nasty looking it's jagged it's open it's ugly they said all they did was take a thin slit across the round hole well obviously what they did here in that hour and a half they expand that wound they tear it open now it's an exit wound you see it's a blowout wound so they can say well yup see no entry won't hear now the head wound in the arrb discover the existence of a woman named sandra spencer interesting woman i don't think you'd ever find a more credible witness than sondra spencer she was the petty officer in charge of the white house lab at the navy photographic center in washington she had a top secret secure security clearance she worked closely with the white house in photographs classified photographs unclassified photographs mrs kennedy enlisted her help when she was preparing the funeral cards uh well she the arb summons her to testify and she tells a remarkable story she said on the weekend of the assassination she was brought the official autopsy photographs and asked to develop them at this white house laboratory it was a top-secret basis she was told they were classified she had kept her secret for 30 years she hadn't told anybody she's a professional she knows what that means but the arb released her from her vows secrecy and so they showed her the official autopsy photographs in the record including the back of jfk's head and they show her this photograph she says no sir that is not the photograph i developed the photograph i developed showed a big exercise wound in the back of his head and she draws it they're in the occipital region the occipital region is the lower back of the skull now clearly we got a problem here because if she's telling the truth

[02:12:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=7920s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=7920s)

because if she's telling the truth and she's accurate we got a fraudulent photograph here you there's no way to avoid that that it's either been photographically authored through photography trickery or they've manipulated the scalp in such a way as to hide the hole now is she the only one that saw this exit hole actually not nurse audrey bell back at uh at parkland there was a massive wound at the back of his head she puts it there in the occipital bone a little lower but still in the occipital region nurse diana borum right there in the back of the head nurse pat hutton madison president kennedy massively in the back of his head how about the doctors dr kemp clark professor and director of neurological surgery at parkland hospital there was a large wound in the right occipital parietal region dr charles karika there was a large quite a large defect about here on his skull skull pointing to the back dr charles crenshaw there's where he put it occipital parietal region dr malcolm perry i'd like to had one briefly by leaning over the table and notice that the parietal occipital head wound was largely of ulcer meaning exploding outward dr robert kennedy he's at bethesda a very large three to five cinnamon wound in the right rear of the president's head in the lower right occipital region clearly an exit wound because it was a vulst admiral george berkeley he was at both at parkland and bethesda a large wound that had all the appearance of an exit wound in the back of his head fort worth newsman roy uh i can't see it i got the screen blocking me uh he he rushes up to the limousine when kennedy's brought in to parkland he sees kennedy lying on in the car on his side and and he says the back of his head was gone dallas ambulance driver aubry pike he helps lift the president's body and put it into the big dallas casket you could feel the sharp edges of the bone at the edge of the hole in the back of his head secret service agent clint hill he's the guy that rushes the back of the limousine when mrs kennedy was crawling on the back

[02:14:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=8040s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=8040s)

on the back he rushes it he jumps on there risks his life and then pushes miss kennedy back and then uses his body to cover the president which kellerman should have done and never did from there to parkland he is staring at the back of president kennedy's head he's lying on the president's body and he says the right rear portion of the head was missing fbi agent james cyber uh he he was at bethesda he says well he sees this photograph i don't have a relic recollection of it being that intact i don't remember seeing anything like this oddly enough he was not summoned to testify before the warren commission that's where he draws the back of the head the occipital region his partner francis o'neil who oddly enough was not called before the warren commission either this looks like it's been doctored in some way and they were testifying separately both him and cyber quite frankly i thought there was a larger opening in the back opening in the back of the head the harper fragment a medical student named william harper finds a piece of bone in dealey plaza after the assassination he takes it to his uncle who happens to be a pathologist at methodist hospital in dallas he pulls his team of pathologists together and they do a detailed autopsy like examination of the harper fragment they determine this is occipital bone they shift the bone to washington it's disappeared uh tom robinson dollar's funeral home they're his circle occipital bone dr robert mcclellan you couldn't find a more credible witness to dr mcclellan i mean he's right up there with sandra spencer graduated from the university of texas medical branch in 54 medical officer in the air force for two years residency at parkland hospital faculty member at ut southwestern anybody will tell you that southwestern is a renowned medical center in texas maybe even the nation founder and first editor of selected readings in general surgery 45 years at southwestern appointed professor emeritus of surgery of

[02:16:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=8160s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=8160s)

professor emeritus of surgery of southwestern the right posterior portion of the skull it'd be an extremely blasted you could actually look down into the skull's cavity itself on november 22 1963 in downtown dallas texas shots rang out and killed president john fitzgerald kennedy joining me today is dr robert mcclelland who is a world-renowned general surgeon who was indeed in trauma bay one at parkland memorial hospital on that fateful day tell us what you were doing in november 22nd i had to literally force myself to keep walking down toward mrs kennedy and walked past her and pushed the door open and walked into trauma room one and was horrified what i saw there immediately was president kennedy lying on his back face up his bloody head and a shot light shining down on him i went to the head of the gurney and leaned over to put that

retractor in the upper edge of that incision they were making and when i got there i said my god i said have you seen the back of his head they said no we just walked in here before you did and we hadn't seen anything but this hole in his neck and i said well there's a wound in the back of his head here on the right side that's at least five inches in diameter a circular wound far in the back of his head to show us where that was it was back here okay and i could actually look down within the skull cavity and see that the whole right uh back half of the right cerebral hemisphere was gone in fact mrs kennedy dr jenkins told me the anesthesiologist had come in carrying a portion of brain in her hand and handed it to dr jenkins when she came in so the back half of the right side of his skull cavity was empty and as i stood there in fact the right

[02:18:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=8280s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=8280s)

and as i stood there in fact the right half of his cerebellum slowly fell out of that hole onto the gurney this has been fascinating dr mcclelland i think i've learned some things and i've been studying this for a few years as well and what do you think that we as americans have learned from these tragic events uh you know that have really marked some changes you know from these great leaders that have really died for for all of america what do you think uh how do you think that's changed america and what lessons do you think we could learn from that well the thing that i mainly have thought and this is just my thought about it is that probably up until that time uh the general population had a lot more faith in the people in charge if you will whoever that is right than they have now right that it kind of destroyed the innocence if you will uh of the american public on behalf of all of plastic syria not really all of americans thank you so much you've given us a phenomenal rendition of that very very important day in in the history of the united states thank you dr rory appreciate it see you now let's go on to the to the brain exams if you're not convinced yet that there's fraud here let's go with the two brain exams uh because here you got again conclusive evidence of fraud not just beyond a reasonable doubt like in a criminal case but really beyond a doubt because the arb discovers that there's two brain exams that the pathologists are saying is one brain exam they're conflating the two into one and the way the arb discovers this is that there is a difference in the in the people who attended both brain exams as well as the times of the brain exams the first one which is right after the autopsy is attended by humes boswell and john stringer who is the official autopsy photographer stringer testifies that the brain was sectioned

[02:20:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=8400s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=8400s)

sectioned cut like a loaf of bread at the second brain exam the arb realizes that it's attended by humes boswell and fink and not stringer there's another photographer there well this picture over here to the right or what depicts the picture of the brain and the official record today is clearly an intact brain it has not sectioned cut like a loaf of bread it's damaged but it's a complete brain well once you cut a brain like a loaf of bread you cannot put it back together again so clearly you have two separate brains here the first one presumably being the kennedy brain and after each section the second one a brain which wouldn't have been difficult to do because bethesda was a training hospital they have organs there now you've got the supplemental autopsy report said that the brain weighs 1500 grams the average human they're referring well the average full size brain is 1350 for an average human being the kennedy brain lost at least a third of its total mass how could he weigh 1500 grams uh fbi agent o'Neill says more than half the brain was missing robert mcclellan in that interview said half the cerebellum was falling out of this hole what he said in that interview is look when he got into that room he went to the head of the gurney and he lifted the head and saw this huge hole and he he told the other doctors uh hey have you all seen this hole and the other doctor said well no we just saw this bullet hole in his throat and we're doing a tracheotomy he says you all need to come and see this because this is a fatal wound i mean there's nobody no way this is going to be anybody's going to survive this and he saw cerebellum he said he could look into the skull cavity so then you've got you've got

[02:22:06 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=8526s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=8526s)

you got maybe uh the autopsy photographer john stringer he disavows the brain photographs at the arb they ask him hey would you identify these he says those are not the photographs i took obviously enough since he was at the first one now let me tell you something about the arr b the assassination records review board was an agency that was called into existence to enforce the john f kennedy records collection act what had happened was that alderstone had come out with his movie jfk which posited this regime change operation in fact it was based on the criminal case that jim garrison had brought in new orleans against a man named clay shaw and so at the end of this movie stone includes this blurb that says the national security establishment something to the effect that they're still keeping all their records secret based on national security here even though they say it was just alone that who did this well people were so outraged over this when they learned this that they pressured congress into enacting over the objections of the nasa security establishment mandated release of all assassination related records from the cia the pentagon the secret service fbi and so forth well but somebody slipped the provision into the law that said they are prohibited from exam investigating anything imagine you've got this agency that's getting these documents and records released but if they come across something they're prohibited from investigating it and so the arrb could not investigate these two brain exams there's clear fraud here i mean this is a conclusive evidence of fraud they're prohibited from investigating it and and the ar board of trustees they strictly enforce this they put the fear of god into the staff there they said if if anybody's ever caught investigating something you will be fired on the spot and really what they should have done the board of trustees should have gone to congress at this point said

[02:24:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=8640s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=8640s)

to congress at this point said we got clear evidence of fraud here and we need an expanded mandate to investigate this and to their shame in my opinion they failed to do that the washington post and the associated press actually carried articles on this double brain exam but no follow-up investigations no op-eds no editorials calling for an investigation of this i mean you'd think some investigative reporter would say let's get to the bottom of this no then you've got the fraudulent x-rays and that was the the the statements that were given in this conference by doctors chester and mantic uh they find a bullet fragment that just happens to be a 6.5 millimeter bullet this huge thing in the front to back x-ray uh that doesn't appear on the lateral x-rays and and it clearly wasn't there in the original x-rays because the pathologist said it wasn't there if they had seen it there they would have pulled it out that was why they had the x-rays and you pull out big bullet fragments like that but you can't miss it it's like huge they they also conducted uh densitometry tests because the back of the head on the x-rays is all really white in a really weird way well it's to block the area out where the blowout wound some of the header x-rays are missing you know surprise surprise and then also the um the skull x-rays don't match the brain photographs then you've got these weird anomalies where commander hughes is caught burning his autopsy notes in the autopsy report which had to be dragged out of him by the arb why didn't he why would anybody do this this is the president united states these are official records well it was because they were evolving their conclusions to fit the official scenario and the first one obviously didn't work didn't fit so they kept changing it after the autopsy was over now here's the most one of the most amusing parts the house medical panel in the 1970 investigation by the house collect committee says to the three pathologists who were there at the body um you've got to move the entry wound that you say the entrance wound the back of the head up four

[02:26:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=8760s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=8760s)

wound the back of the head up four inches and they said why well because down where you have it doesn't fit the official scenario it would come out his face or blot his face or it doesn't follow the bullet fragment whatever you got to move it up four inches and they weren't even there they didn't see the body and they're telling the pathologist oh what a tangled web we weave when first we practice to deceive now and there's also the robert knutson mystery this is fascinating robert knutson is a social photographer for the white house very admired man very well-liked he was a social photographer there since the truman administration he continued after kennedy was assassinated through johnson and nixon and um this photograph he took of president kennedy and john john and on the weekend of the assassination he gets a telephone call saying

we need you to come down and photograph the autopsy and he tells his wife i'm going down to photograph the autopsy he's gone all weekend he comes back tells his wife it was so difficult to do this i can't tell you they've sworn me to secrecy it's classified but it was very difficult to do well then he gives he gives an interview in 1977 i think with a national photography magazine i think it was called photography today where he says yeah i was the kennedy autopsy photographer very difficult job can't talk about it but then in his obituary both the washington post and the new york times say he was the autopsy photographer now there's just one problem he wasn't he was not the autopsy photographer he wasn't even at the autopsy that was john stringer who was a very competent civilian for working for the navy guy taught photography very renowned it was jon stringer newsome wasn't there but clearly newton's telling the truth because there's no way he's going to make up something and destroy his reputation with the white house they never would have kept him on if he was lying uh i mean he never would have been stupid enough to give the interview with his magazine because he could have been called on it if he was making it up

[02:28:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=8881s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=8881s)

called on it if he was making it up he has photographed something that he has been told is the autopsy and then later he he is asked to go down and examine the autopsy photographs he comes back and he tells his wife his wife relays this to the arrb he came back and he said to his wife there are clearly shenanigans going on with these photographs and i want you to know if this thing blows up ever i had nothing to do with it because he was very concerned about his reputation about how his wife and family felt about him and his integrity the case is closed i've told people this since i published my book the kennedy autopsy you don't need to study dealey plaza and all the bullet trajectories and all that stuff all you have to do is study the autopsy read douglas horn's masterpiece watershed book inside the assassination records review board he was on the staff of the arrb that once you establish it was a frauds and an autopsy and i believe that if if you've been with me this far in this presentation you will see the evidence establishes beyond a doubt this was a fraudulent autopsy there is no innocent explanation none for a fraudulent autopsy there is only one possible explanation it is part of the cover-up it is part of the assassination itself there's no way they could have spontaneously come up with this plan at parkland hospital hey let's have a frozen autopsy it had to be built as part of this world war three scenario a fraudulent autopsy necessarily leads to the national security establishment so the only defense that people have now that subscribe to the official version is subscribe conspiracy theory that you're a conspiracy theorist and it's very effective as i indicated earlier people are scared to death to be called a conspiracy theorist and that's all they have left they can't deal with this notice that you never find any discussion of this in the mainstream press of the autopsy never like with the exception of those two articles back when um they don't want to deal with that they they want to deal with this nonsense of conspiracy theory how do they handle the uh

[02:30:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9000s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9000s)

they handle the uh the explanation for all of these people that saw this back of the head wound well this is what some of them say they say oh it was very stressful there at parkland they were dealing with the president they imagined the wound those doctors just under the stress yeah right dr mccllellan is going to be hired for 45 years at southwestern after having imagined a wound that didn't exist i mean you know in in that in that interview any details what happened you can imagine what happened under this scenario he calls all the doctors and says hey look at this head wound and all the doctors move to the head and the gurney and they say oh dr mccllellan are you referring to that imaginary wound there yeah it's the imaginary wound oh yeah we all see the imaginary wound and then the nurses pipe in hey wait count us in too we see the imaginary wound and oh and you know the clint hill outside and the newsmen they overhear the conversation through a window wait wait we saw the imaginary wound too and the harper fragment well that was just an imaginary piece of bone those pathologists never really saw bone it was just imaginary oh wait a minute let's not forget the doctors at bethesda they're part of this imagination thing saunders spencer in washington what we really have here under this explanation this scenario is a conspiracy of imagination you see not not an imaginary conspiracy but a conspiracy to imagine wounds it's ludicrous you know what's going on here they cannot acknowledge these people in the mainstream press the promoters of this official

story they cannot acknowledge that their little monster that was brought into existence to kill foreign presidents and foreign prime ministers turned inward and killed an american president based on the same grounds that those foreign leaders are being assassinated the grounds of national security and finally let me say something about the incompetence crowd and what's called the research community in this this uh kennedy area there's people that say oh jacob jacob

[02:32:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9120s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9120s)

there's people that say oh jacob jacob if only we'd had competent auto autopsy physicians if only they'd been forensic pathologists we wouldn't have this mess oh it's such a mess jacob if only he had been competent it's ludicrous ludicrous the last thing they wanted was a competent autopsy if they wanted a cop an autopsy they would have had dr rose do it they prohibited rose from doing it now you can have incompetent physicians engaged in fraud which is clearly what you add here but incompetence per se is opposite of fraud it involves negligence how does negligence explain the two brain uh examinations you know they were just negligently lying about two brain exams ridiculous you know what's going on here is that these people that focus only on the autopsy that it was a fraudulent they get themselves all embroiled in the autopsy and they can't go beyond it they're just trapped in this box they don't know whether to say oswald was framed whether oswald did it whether he had confederates whether or not they just cannot cross the line that where they have to acknowledge that this was a fraudulent autopsy that was conducted by the military establishment they don't want to accuse the military that which means they don't want to go all the way and say this was a regime change operation it's what really can be called moral cowardice or really which is the opposite of a profiling courage why address the kennedy assassination i get that question all the time at fff it is imperative if we're going to get this country back on the right road that we acknowledge and confront our nation's legacy as a national security state including all the assassinations not just the domestic ones along with mk ultra the coups the torture the invasions the forever wars the shifting array of official enemies including russia and china and all the rest of the horrors that have come with a conversion to a national security state denial accomplishes nothing this is where the mainstream press has failed america they cannot acknowledge that the little monster that was brought into existence to call foreign leaders turned inward and killed an american president

[02:34:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9240s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9240s)

and killed an american president based on the same ground national security this is all what john kennedy would have ended he was ahead of his time and interestingly enough he was ahead of our time as well what we need to do is seek the truth and speak the truth that's the key to putting america back on the road to liberty peace prosperity morality and harmony with the people of the world let's move into q a and at this point i know we only have time for one or two maybe three questions i'm going to invite douglas horn to join me doug horne and i are on the exact same page with respect to this assassination there's a reason why i dedicated my book the kennedy autopsy which remains fff's all-time bestseller to doug horn doug horn has had the courage of his convictions in this thing he is the only guy who has really steadfastly put this whole thing together in a consistent logical manner where all the pieces to the puzzle fit now we don't have all the pieces but the pieces we do have all fit together the way doug horn has figured this thing out i put his book inside the assassination records review board right there with james douglas's jfk and the unspeakable which is an absolutely fantastic book i i recommend that is the first book anybody reads when they discover and want to explore this further so i've invited doug to join me i should also mention that doug we had problems with doug's uh presentation last week he had to do the whole thing over but you got a benefit out of this his two and a half hour presentation last week has now been turned into a five-hour presentation that will be posted either tomorrow the next day and working on it and uh it's an honor to have him join me

[02:36:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9361s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9361s)

and uh it's an honor to have him join me in this q a he's also going to be joining me in in our q a panel next week doug thanks for joining us thanks very much jacob uh it's an honor to be here for your q a i really enjoyed your presentation and if i could uh before you get to questions i'd like to make just one small clarification in the interest of the historical record can i do that absolutely thank you all right uh the boys report is very important it's it's extremely important uh but he did not describe what type of casket it was he gave the exact time of the casket entry which was uh 18 35 hours 6 35 pm and the people that described the type of casket he provided the time the people that provided the description were dennis david donald rubentisch paul o'connor floyd riebe and others so there were plenty of witnesses that it was definitely a shipping casket and as you said the galler's document said it was a shipping casket and that had a definite meaning in the funeral trade that means it was a cheap 60-pound aluminum box not a 400-plus pound bronze ceremonial casket so he i did speak to him on the phone i'd like to confirm that and uh he confirmed that's what he did and that he wrote the report he authenticated it orally with me and then emailed us a very good photocopy of it he didn't want to give up the onion skin a red you know so-called original carbon that he had he authenticated it in writing sent us a letter and that's in the national archives now so that is a very important document okay great let's move into q a uh the first question is discuss how lbj and his deep state minions established the clark panel to marginalize or deflect possible criticism of the warren commission report by robert kennedy once he had entered the 68 presidential race

[02:38:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9480s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9480s)

the 68 presidential race a precursor to their plans to eventually assassinate rfk uh yeah that's covered in my my second book the kennedy autopsy too it's fascinating because you see every indication was that johnson was going to run for reelection johnson loved being president he'd want to be president since he was in college and that was his main goal in life to become president so every indication was he was running for reelection and you know this notion that he got scared of robert kennedy and after gene mccarthy almost beat him there in new hampshire is nonsense johnson was a fighter he was never the kind of guy to run away from a fight and he hated bobby kennedy and the thought that he got scared of bobby kennedy i don't think so and so he he knew though that that the kennedy assassination was likely to be a part of this race especially when robert kennedy entered i mean it was pressly no doubt which obviously now raises real danger to the national security establishment what if sandra spencer pops up and says hey i want to weigh in here well to to ensure himself against this this contingency johnson establishes the clark panel which is named after ramsay clark his attorney general to really like certify that this autopsy was all done according to hoyle that everything was correct so he's got a backstop that this was not a fraudulent autopsy because he's expecting that something could go wrong here in this race and so he pulls this thing together it's clearly part of the political race here now of course in the the question is why does johnson drop out and what i say in my book was it's it's not because the mainstream press says that he was scared of running because even after he he almost loses in new hampshire where he was a write-in candidate that he tells aids get ready for wisconsin we're going to wisconsin and then he drops out and my hunch is at the national security establishment walked into his office and said you're out we cannot afford to have you in

[02:40:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9600s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9600s)

out we cannot afford to have you in because the assassination is clearly going to be an issue here and we can't afford to have an issue because it's going to lead to us you're out and we're going to let humphries take over you have a point here to make doug oh just a brief one uh the clark panel is the first body that suggested the entrance wound should be moved up four inches from low in the back of the head to up in the calicury and the house committee you know jumped on that and decided and they said yeah we believe that too and the reason they both did that is they decided to bet the farm on the accuracy of the autopsy photos of the back of the head and to bet the farm on the accuracy of the skull x rates and so we've had dr chesser and mantic talk to us about how the skullx razor forged copy films altered copy films and obviously with all these slides you showed tonight there were many many many credible witnesses that there was a big blowout in the back of the head and of course we don't see that in the autopsy photos so the clark panel and the hscA didn't want any part of telling the federal government that you guys were engaged in fraud they

didn't want any part of that so they decided to bet the farm on those images and they ended up getting a bad result okay next question if a non-intervention is elected president of the united states should he or she purge the military intelligence committee and diplomatic corps in the style of stalin or khomeini's military purges or in order to prevent the deep state from murdering the non-interventionist president uh no what we really need to do is think at a higher level here you see that assumes the continued existence of the national security state the point i'm trying to raise here with this presentation is okay you know all the people that are involved in this assassination are

[02:42:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9720s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9720s)

involved in this assassination are clearly dead but the re one of the reasons it's so relevant is because we've got to think at a higher level the apparatus that pulled this off we're not talking about just some roads here this is a regime change operation on the part of the national security branch of the government we need to dismantle the national security state that was brought into existence and restore a limited government republic that was our founding governmental system that means you get rid of the ir i mean the irs foreign slip the uh the cia the nsa the pentagon the vast military industrial complex you leave a just the basic military force like the type of system we had for 150 years went away in doug no let's go on okay jacob you've made an eloquent and convincing case that the jfk assassination may have been a national security state regime change operation fast forward 60 years do you believe there is evidence that the caa or the so-called deep state played a role in the defeat of our recent president i have no idea i mean and and i guarantee you that if they did you're not going to learn about it for another 50 years i mean it's very possible that 50 years from now people say well i'll be darned look what they did but these people are too good if they did play a role nobody's going to discover it so there's no point dealing with it it's just not going to happen uh doug you have anything to add i have something to add on a point that you made during your talk in case we run out of time i want to make this point now okay the two brain exams are the most important proof of a medical cover-up and they invalidate the argument used by many people in the so-called jfk research community i call it the jfk research dystopia the point that they want to make which is that it's just an incompetent autopsy as you said the two brain exams prove that the problem is not incompetence

[02:44:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9840s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9840s)

problem is not incompetence the problem is intentional cover cover-up so i can't emphasize that enough and i'm glad you talked about it yeah and i'll add to that that they never mention the fraudulent brain exams they act like they've just airbrushed it out of their minds they don't talk about it because it doesn't fit within their paradigm of incompetency there's no way that that incompetency can lead to two brain exams that are falsely conflated as one that's right i i worked with six weeks for six weeks with deb deb riekmann of ap at the time uh to get the first article out and she scooped the washington post and the guy over there ring lerner i mean junior he was so upset that he uh he demanded to interview me that day the day her story went on the wire so the washington post story came out the very next day because he was upset that he got scooped but after that uh nothing somebody must not have been very happy about that all right lawrence says castro was meeting with jean danielle the very day jfk was murdered and that was kennedy's emissary to castro and he says that was strike three and what he's referring to strike three is that that that friend of jfk um read faye he actually gave a longer answer than i provided on the slide uh he's uh kennedy said to him yeah it's possible that if a neophyte president has a bay of pigs and then has a second bay of pigs and then the third one he said they'll kind of give you some slack on the first two but on the third one they will remove you from office there's no question about it and so he's he's suggesting that meeting with castro was strike three um i guess the first two strikes being the cuban missile crisis in the bay of pigs all right let's see regarding the mafia activities in cuba please clarify that organized

[02:46:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9961s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=9961s)

in cuba please clarify that organized crime in cuba wasn't exclusively italian-american meyer lansky the leader of the mob's exploitation of cuba in the 50s the descendants of jewish gangster meyer lansky are seeking compensation yeah i don't know uh i don't have a comment on that do you i would just say it's a distinction without a difference the point is that the cia mafia plots began in august of 1960 under president eisenhower and it was richard bissell that started all that and uh they just continued into the kennedy administration and then you had cia officials for decades telling the big lie that the kennedys were behind the mafia cia plots and and the people lying about that were richard bissell who started it all in 1960 and sam halpern who continued the lie for decades so uh just let's remember where those started and under what agency that's all okay uh is james angleton a prime suspect as having been the handler of oswald's framing as the patsy i think angleton clearly has to be a suspect in this thing he's a high cia official he would have known about oswald being a a covert agent uh he was certainly in in part of that ring that was monitoring oswald before the assassination which the cia also kept secret now why would they be monitoring this guy well if he's being framed if he's an agent being framed you got to make sure that he's not on to you and if he gets onto you you got to abort the plan and so you got to watch a person real carefully to make sure that he hasn't busted you and that would be a reason for monitoring so angleton other plays another role that when mary pinchot meyer got murdered on the cno canal trail angleton right after that murder breaks into her house effectively commits a felony he burglarizes her house to find her diary and then he finds it

[02:48:01 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=10081s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=10081s)

to find her diary and then he finds it and he destroys it which he knew would be critical evidence in the criminal prosecution of a guy who was claiming he was being framed a guy named ray crump in the thing and what what angleton should have done was turn this diary over to the police i mean clearly the diary her diary she may have talked about somebody following her she may have talked about her conversations with kennedy over the dangers that the national security state posed to her as well i mean this was clear evidence that should have been turned over to a court this man commits clear obstruction of justice he keeps it secret he destroys it he doesn't disclose it till many many years later when the statute of limitations on prosecuting him was over angleton clearly is a suspicious character in this whole thing what do you think oh yes i'd like i think i got time to say a few things about him uh john newman explained all this in a very good way in the epilogue to his book oswald and the cia he wrote an epilogue in the year 2008 so it's in the uh trade paperback edition published by skyhorse that epilogue is worth the price of the whole book angleton was responsible he's head of counterintelligence in the cia he's responsible for hiding the facts from a lot of other people in the cia hiding records on oswald within his own agency so that nobody knew he had come back to the united states and so that nobody knew he had been to mexico city to meet with people that were not in his interest to meet with now whether it was the real oswald or an imposter the oswell figure in mexico city met with the head of soviet assassinations in the western hemisphere kostikov and then he was in the cuban embassy and uh demanding you know to go through cuba on the way back to russia and so angleton hit all those things so that they would only be known of on the day of the assassination

[02:50:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=10200s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=10200s)

day of the assassination that's when most of the agency found out oh this guy's back in the country now oh my god he went to mexico city he met with these people down there oh my god we have to cover this up or we'll have world war three so as john newman says uh he's responsible for planting the virus that created the world war three cover-up that and the fact that there were shooters from the front as well okay uh jacob thanks for the great presentation do you think the dre's immediate media release on oswald after the assassination was part of the assassination plot plan or do you think it was the dre acting on an immediate opportunity to lay the blame on cuba since they already had interaction with oswald as the pro castro sympathizer we know the dre contacted joanitus asking for guidance on november 22nd after it almost instantly after oswald was arrested as a suspect thanks well of course it's impossible to know but my conviction is this is part of the plot they've got to advertise uh oswald's communist bonafides that's essential to the plot here so that nobody comes to his defense now whether the dre i don't think the dre would have been read in on that hey you're participating the assassination but i think the cia would have said we need to

get this out now the cia would never admit that they would say oh we were just kind of standing by and watching what they were doing i don't think there's any doubt that the cia was directing and supervising exactly what was going on here including the sending out of this press release that's right uh the cia's expertise is in psychological operations and propaganda they're not very good at killing people i mean in a few cases they have been but generally speaking the military is a lot better at killing people in setting up a military-style ambush than the cia but the cia is great at propaganda so i'm sure that the dre activities the day of the assassination and the next day were directed as

[02:52:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=10320s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=10320s)

next day were directed as you know the cia as john newman says were willing had maidens to their partner in this coup and that's high-level military leadership so they were the willing handmaidens handling the propaganda angle the setup of the apache somebody brings up the killing of kiki camarena and makes a very good point that there's a great documentary forget the name of it and he didn't mention it here that that goes into this the killing of kiki kamina in the aftermath in which a cia official hector yes is assigned the task of investigating the case and the documentary makes a very persuasive case that a cia agent was present at the torture and execution of kiki kamadena because kamadena might have been suspecting that the cia was involved in the drug running in complicity with mexican high officials and that they had a key interest in this too so i highly recommend that documentary jim no question yet just to comment that this is a great overview of the strategic context the motives and the major aspects what need to be addressed it so far leaves out the operational plans that were incorporated pathfinder valkyrie northwoods all combined and customized for purpose i hope fff posts the replay of this talk well done yeah you know i think both doug and i have gotten to the point that you know it doesn't really matter how the ambush exactly happened in in dealey plaza what really matters is this was a cold war regime change operation that you got to think at a higher level here and think in terms of regime change rather than just some rogue operators figuring out we both agree that this was a military ambush that the military carried out but we both i think agree that the cia is the one that planned and orchestrated it because it was a brilliant plan i don't think the military had that kind of brilliance

[02:54:00 \(https://www.youtube.com/watch?v=BdQD9vNPYSk&t=10440s\)](https://www.youtube.com/watch?v=BdQD9vNPYSk&t=10440s)

military had that kind of brilliance we've got about two minutes doug so what happened after jfk died uh what happened was all the initiatives in the peace speech died except well the test pantry had been ratified so that was law but the attempt to in the cold war died and all of these frustrated warriors in the national security state who were so frustrated by the korean war and the way it ended in a stalemate and they couldn't get their war in cuba but so they got one and they got it in southeast asia they couldn't get one in laos like they wanted they got one in vietnam which was most unfortunate for the southeast asians and for the american soldiers yeah 58 000 of them our generation died for nothing not to mention all the ones that are wounded and maimed all right we've run out of time i'm really sorry that we have very small amount of time for q a but both doug and i will be back here along with other panelists uh to discuss the political context of the assassination next week please bring your questions there i'm not sure i'll be able to access the ones that you have here we've got over 40 questions really sorry i couldn't get to them all and we'll look forward to seeing you next week and doug thanks again for joining me here my pleasure thank you

---

END
